0. INTRODUCTION
ANNUAL REPORT 2015

FOREWORD FROM THE CHAIRMAN
Manuel Morón Ledro

Between 2000 and 2015, the Port of Algeciras Bay has doubled its traffic volumes, going from 48 million tonnes of throughput in the first year of the millennium to the 98-million-plus tonnes last year (up 104%); in the meantime, container throughput has risen from the 2 million TEUs in 2000 to the 4.5 million last year (up 125%). These figures put the Port of Algeciras Bay at the top of growing European ports - a well-earned return on the hard work of all the companies and workers at the Port of Algeciras Bay. The figures have been reached arm-in-arm with traffic and operator diversification, along with accurate port investment forecasting - public and private - that have allowed our Port to become one of only two in the world that can accommodate completely loaded megaships at the current date.

In 2015, our terminals at the Port of Algeciras Bay ran 99 megaships from Maersk, MSC and CMA-CGM lines, all incorporated into the 2M and Ocean Three alliances. Once more, we have come tantalisingly

close to a 'ton' - a symbolic marker for many of our objectives. Proof of our good work was acknowledged in the North American "Journal of Commerce", that again mentioned the Port of Algeciras Bay as the most productive Mediterranean port and third most productive in Europe, an award that we shared with our terminals and workers.

Among the most significant figures reached in 2015 are the 27 million tonnes of liquid bulks and the 290,755 HGVs that used our "sea-bridge" across the Strait of Gibraltar - a vital thoroughfare for trade between Europe and Morocco that companies are using more and more.

Financially speaking, we have invested €45.5 million on infrastructure; our trade volume returned €79.9 million, with a €21.8 million profit (down 3.46% over 2014) that was a result of having kept on discounting activities until we have become the most economical port in Spain in terms of fees (down by 36%).

0. INTRODUCTION
ANNUAL REPORT 2015

Our determination to incorporate our port seaboard into the cities in the Bay of Algeciras has seen great efforts be made in 2015 with the resumption of work on the “Paco de Lucia” central gate at the Port of Algeciras; the work undertaken at the Port of Tarifa to link the fishing docks and commercial quays and take advantage of the last square metre of quay space. The aforementioned dock, with an incredible performance for such a small space, saw 1.3 million passengers and more than 236,000 vehicles use the line to Tangiers City Port.

At the same time, the Port of Algeciras Bay has taken on a significant change to our public image. Our modern port has very little to do with what had been depicted in our old logo, so what had been marked down as an important challenge for 2015, has been a complete success.

A similar on-going success is the technological boost we are immersed in with the help of European finance, to strengthen cultural innovation systematically. We aim to be an international benchmark for port-logistics technology and innovation by 2020.

Of course, there is still a long road for us to walk down: however, the end of last year witnessed a great leap forward for equality when the first female pilot in Spain was hired by the Port of Algeciras Bay. Our quays and docks welcomed thousands of visitors from the surrounding area, thanks to initiatives like “Get to Know Your Port” and the programme of school field trips that lets our future generation gain a first-hand experience of what could be their future.

2.5.2 SPECIAL LOADING AND UNLOADING FACILITIES

LOCATION	OWNER	YEAR BUILT	CHARACTERISTICS
"Gibraltar" Oil Refinery Pier	Cía. Española de Petróleos, SA (CEPSA)	1966	20 hydraulically-articulated loading/unloading arms with pipelines to storage tanks; 6 manually-articulated loading/unloading arms. Installation can be used for any Refinery product. facility capacity dependent on pumping capacity of tankerships. Maximum admitted pipe pressure: 150lb/inch.
Bay of Algeciras	Cía. Española de Petróleos, SA (CEPSA)	1976	Sea island to unload crude from VLCCs, etc.
Puente Mayorga dolphins	Dirección General de la Cuenca Mediterránea Andaluza	1981	2 x 12-inch water-loading points. Flow: 5760Tm/h.
Endesa-Puertos facility	Endesa Generación, SL	1984	1 x 1,500Tm/h (max) continuous loading gantry crane. 1 line of 4,500 Tm/h (max) conveyor belts for unloading. 1line of 1,500Tm/h (max) conveyor belts for loading.
Endesa-Puertos facility	Holcim España, SA	2009	2 loose cement unloading points and pipeline to storage silos. Unloading capacity: 200 Tm/h.
Ingeniero Castor R. del Valle breakwater	Compañía Logística de Hidrocarburos CLH, SA	2012	3 refuelling/defuelling pipes, each with a 750 MT/h capacity.
Ingeniero Castor R. del Valle breakwater	Compañía Logística de Hidrocarburos CLH, SA	2012	3 10-inch refuelling/defuelling folding arms connecting with 4 pipes for IFO and Gasoil. 8Kg/csqm maximum working pressure and a 3,000 MT/h flow.
Explanada Isla Verde Exterior	Vopak Terminal Algeciras, S.A.	2013	Hub Distribution. Petrol product storing facilities: 22 tanks ranging from 2,000 to 40,000 cubic metres. Dock (25 metres in draught) providing access to vessels and barges.

ANNUAL REPORT 2015

2.8 BRIEF OVERVIEW OF SPECIFIC
TRAFFIC FACILITIES

PASSENGERS

ALGECIRAS

Ferry Berth:

There are nine ferry berths that serve the lines covering the Strait. Passenger transfer is by elevated platforms and walkways that connect the berths with the Passenger Terminal.

Passenger Terminal:

The main passenger terminal building occupies a 12,000 sqm surface area. The ground floor is for ticket offices, shipping-line offices, shops and institutional offices, together with disembarkment halls. The top floor has embarkment and disembarkment areas and a cafeteria, as well as luggage, passport and ticket control points.

The main shopping area is in the annexe building, which occupies a 7,900 sqm surface area over two storeys. The ground floor is used by travel and forwarding agents and the top floor is used by various forwarders and shipping companies. On the west wing of the building is where we have located our Heliport terminal.

Multi-Storey Car-Park Building:

This facility is mainly used by passengers travelling to Ceuta or Tangiers and who prefer to leave their cars in Algeciras. The car-park has 810 spaces over 3 floors (180m x 38m). The ground floor is open-plan and is used for arranging embarkment of vehicles onto ferries. The fourth floor is our helipad.

TARIFA

Berths :

There are three berths that are currently being used by fast ferries covering the line to Tangiers.

Passenger Terminal:

The Passenger Terminal brought into service in April 2003, occupies a 2,116 sqm surface area divided into two storeys. The ground floor is where the ticket-sales premises and shipping-line check-in offices, cafes and official institutions are to be found.

2. TECHNICAL SPECIFICATIONS OF THE PORT
ANNUAL REPORT 2015

CONTAINERS

APM Terminals Algeciras:

This terminal is located on Juan Carlos I Quay and occupies a 686,132 sqm surface area holding 10,476 TEU container slots. It has a 1,941m berthline offering draughts of between 14 and 16m. There are 19 Portainer cranes (4 x 72 tm, 6 x 63,50 tm, 3 x 62,50 tm, 6 x 59,70 tm) and 59 transtainers (49 x 61 tm, 10 x 40 tm) that work the terminal.

Total Terminal International Algeciras (TTI-A):

This new terminal, located on Isla Verde Exterior Quay, occupies a 35.76 Ha surface area. It has a 650m berthline with 18.5m draughts, 8 Portainer cranes and 32 transtainers (40tm).

RO-RO TRAFIC

There are 7 other Ro-Ro ramps (apart from the ones mentioned under the passenger section) with 10.5m draughts located on the following quays: one on Isla Verde with draughts of 10m; one on the Ingeniero Castor R. del Valle Breakwater with draughts of 14.5m; another on Principe Felipe Quay with draughts of 14.5m; and two on Juan Carlos I Quay (one on the North side and one on the South side, with draughts of 9m and 10.5m, respectively). And another two ro-ro

berths on Isla Verde Exterior Quay (one with 17.50m draughts on North Quay and another with 18.50m draughts on the Quay adjacent the breakwater).

OIL

Sea island:

This facility is located at a depth of 60m, allowing even the largest of the ULCCs to berth and unload crude. It also has a bunkering facility.

CEPSA’s “Gibraltar” Oil Refinery Pier:

With nine berths and draughts of between 6m and 20m, this facility is dedicated to loading and unloading crude and refined petroleum products by 26 articulated arms.

WATER

The Andalusian Mediterranean Water Authority’s dolphins are located in Puente Mayorga, near San Roque:

Berthing system for the loading of water in tankers up to 115,000 TPM, made by berthing and mooring breakwaters. Two 12-inch water inlets with a flow of 5,760Tm/h.

FRESH FISH

ALGECIRAS

Fish Market:

With a total surface of 8,770 sqm, it is divided in auction areas, circulation and premises run by exporters, shipowners and other activities.

TARIFA

Fish Market:

The fish market occupies a 1,093sqm surface area, arranged in the same way as the Algeciras market.

COAL

Endesa Puertos Pier:

Endesa has a 360m unloading pier with draughts of between 23m and 30m that can handle ships of up to 270,000DWT, and worked by a 2,250Tm/h gantry unloading crane. Its loading pier is 234m long, with draughts of between 8m and 30m for ships of up to 25,000DWT, served by a 1,500Tm/h gantry loading crane. The northern part of the latter quay is fitted out for loading and unloading other dry bulks.

CEMENT

Endesa Generacion Pier:

The quay, 234 metres in length and an 8 to 30 metres draught. Since later 2009 there are two cement discharge outlets connected by pipes to a multi-chamber store with a capacity up to 14,000 tm.

SPORTS & LEISURE

There are a range of piers for sports and leisure boats under license:

- Algeciras: 19 piers of between 60-100m length.
- Tarifa: 6 piers of between 60-145m length.
- La Linea: 24 piers of between 60-136m length.

We closed the year with more than 1,600 sports and leisure boats using APBA’s facilities on the above areas.

Goods	DOMESTICS			FOREIGN			TOTAL		
	LOADED	UNLOADED	TOTAL	LOADED	UNLOADED	TOTAL	LOADED	UNLOADED	TOTAL
General cargo									
Acyclic Polycarboxylic Acids, their Anhydrides, Halides & Peroxyacids									
Setts, Kerbstones & Flagstones									
Citrus Fruits - Fresh or Dried									
Water (including Still & Fizzy Mineral Water)									
Buckwheat, Millet & Canary Seed									
Cotton									
Raw Aluminium									
Articles for Cargo Conveyance or Packing									
Cocoa Beans - Whole or Broken, Raw, Roasted or Powdered; and Chocolate									
Coffee (including Roasted or Decaffeinated); Husks & Skins									
Meat of Bovine Animals - Refrigerated or Frozen									
Meat of Swine - Fresh, Refrigerated or Frozen									
Other Meat & Edible Offal									
Structures & Parts of Structures									
Crustaceans - Whole or Shelled, Live, Fresh, Refrigerated or Frozen									
Metal Waste & Scrap									
Malt Extract; Food Preparations of Flour									
Fish Fillets & Other Fish Meat - Fresh, Refrigerated or Frozen									
Fruit, Nuts & Other Edible Parts of Plants									
Hematite Pig-Iron									
Artificial Graphite									
Fish fats & oils									
Wadding of textile materials									
Other meat & Edible Meat offal									
Other vegetable									
Other articles of plastics									
Other prepared or preserved meats

6. WORKS
ANNUAL REPORT 2015

6.2 A BRIEF OVERVIEW OF
SIGNIFICANT WORKS

Having been commissioned before 2014, the following interventions were completed throughout the year 2015, notably:

- Project to arrange the area around the passenger Terminal, car-park, and control facilities at the Port of Tarifa.
- Reinforcement of the quay and draft improvements between bollards N° 1-22 on Juan Carlos I Quay.
- Refurbishment of N°2 quayline at the Port of Tarifa

A total of 11 works were started in 2015. The following were completed within the year:

- Project to alter offices for an Operations Centre at the Port of Algeciras.
- Supplementary project to arrange the layout of the port spaces between the Marina's Rivera Quay and the future access road parallel to Avenida Principe de Asturias to access APBA facilities.

- Supplementary project to arrange the area around the passenger Terminal, car-park, and control facilities at the Port of Tarifa.
- Demolition of the western side of Isla Verde warehouse.
- Fitting-out of esplanade and pilot beam on Isla Verde Exterior East Quay Phase B.
- Fitting-out of Ingeniero Castor R. del Valle Breakwater access road.
- Supplementary works to fitting-out of Isla Verde Exterior Detached Breakwater at Port of Algeciras.
- Fishing Dock access road refurbishment and BIP roundabout at Port of Algeciras.

Started within 2015:

- First Phase Project to refurbish and integrate unused port spaces at the Port of Algeciras: areas next to sub-station and access to APBA Headquarters.

- Project for urban development next to Civil Guard Offices at Port of Algeciras Headquarters
- Project to convert buildings in to warehouses 1, 2 & 3 on the Fishing Dock at the Port of Tarifa.
- Second Phase Project to rearrange layout and develop Fishing Area at the Port of Tarifa.
- Reinforcement of N°3 Berth quay base at Port of Tarifa.
- Improvements to draft between N°1-22 bollards on Juan Carlos I Quay.
- Supply and installation of fenders between N°1-20 bollards on East Juan Carlos I Quay at Port of Algeciras
- Replacement of prefabricated items on the Algeciras Passenger Terminal car-park façade
- Extension of Campamento inner basin North Quay (San Roque).
- Technical Assistance for geo-technical research campaign during Ro-Pax Terminal expansion work at the Port of Algeciras.

18 work settlements have also been carried out, notably:

- Roundabout at the access road to Isla Verde Exterior to connect to Ingeniero Castor R. del Valle Breakwater.
- Rearrangement of Tangiers embarkment and disembarkment layout and new National Police Force and Civil Guard control points at Port of Algeciras.
- Refurbishment of N°2 quayline at the Port of Tarifa.
- Landscaping work carried out to the ferry terminal access roundabout at the Port of Algeciras.
- Phase B car-park works for heavy cargo traffic on Isla Verde Interior.

6. WORKS
ANNUAL REPORT 2015

BRIEF OVERVIEW OF SIGNIFICANT WORKS

Second Phase Project to arrange and develop Tarifa Fishing Premises.

The aim of the project at hand is to complete the arrangement of the layout of the Port of Tarifa’s fishing area, which arose due to the 2004 Agreement signed together with its Town Council. At the same time, we were to rearrange the layout of the fishing area itself, once transferred to the dock where it was supposed to be relocated. After this, the pending Safety & Protection measures as established under the current Protection Plan were to be implemented.

The location of the greater part of the works is within the fishing area at the Port of Tarifa: an APBA service area; although – due to the fact that part of the works are to be done on the port’s perimeter enclosure, lesser adjacent areas would be affected by the Port of Tarifa’s external land service boundary, located in Calle Alcalde Juan Nuñez.

The works listed in the project complete the road connection via an esplanade created as a result of vacating and demolishing the old slipway facility. The rearrangement and development works carried out under the 2006 Phase 1 Project is still on-going in the rest of the fishing area at the Port of Tarifa.

The abovementioned road will connect all internal communications between the port and the shopping area, where the leisure berths, pre-embarkation areas and fishing area is located at the Port of Tarifa.

Apart from the thoroughfares, the project also includes the works to be carried out in order to complete the full enclosure of the port area, and the paving of the adjacent areas – on the section of Calle Alcalde Juan Nunez – and the fishing area’s new portico gateway, along with other works required to organize the Port of Tarifa and make it more efficient.

Project for urban development next to Civil Guard Offices at Port of Algeciras Headquarters.

The works included in this project consist of the enclosure and urban development of the plot of land where the new Marine Civil Guard and Canine Research Centre headquarters. Works are to include land movement, surfacing and all the services required to make the new facility work correctly, as well as the consolidation of the south-western edge of the plot that borders the sea, where a containing wall has been projected.

Surfacing of all the buildings’ outside areas on the plot are to be treated uniformly, both in road and parking as well as pedestrian areas, due to the restricted size of the area itself and to ensure that work is carried out as easily as possible.

A double water supply network has been projected: one for human consumption and another to feed the fire-fighting reservoir.

Internal telecommunications and CCTV networks have been projected. The telecommunications network is to link up with the external, port-area telecommunications network via dual, 110mm PVC pipelines placed between two M-type junction box cabinets at road crossings and at the foot of the plot of land.

Supply & installation of twelve (12) moving walkways at N & S Branch of embarkment tunnels at Algeciras Port Shipping Terminal Berths 7 & 8.

Installation of moving walkways to help the transfer of foot passengers around the embarkment areas, because they allow passengers to walk to and from the Passenger Terminal more conveniently. Eight 1.10m-wide walkways have been installed in the

Tangiers area and four 1.40m-wide walkways have been installed in the Ceuta area.

Project to install floating jetties for leisure boats at Port of Tarifa.

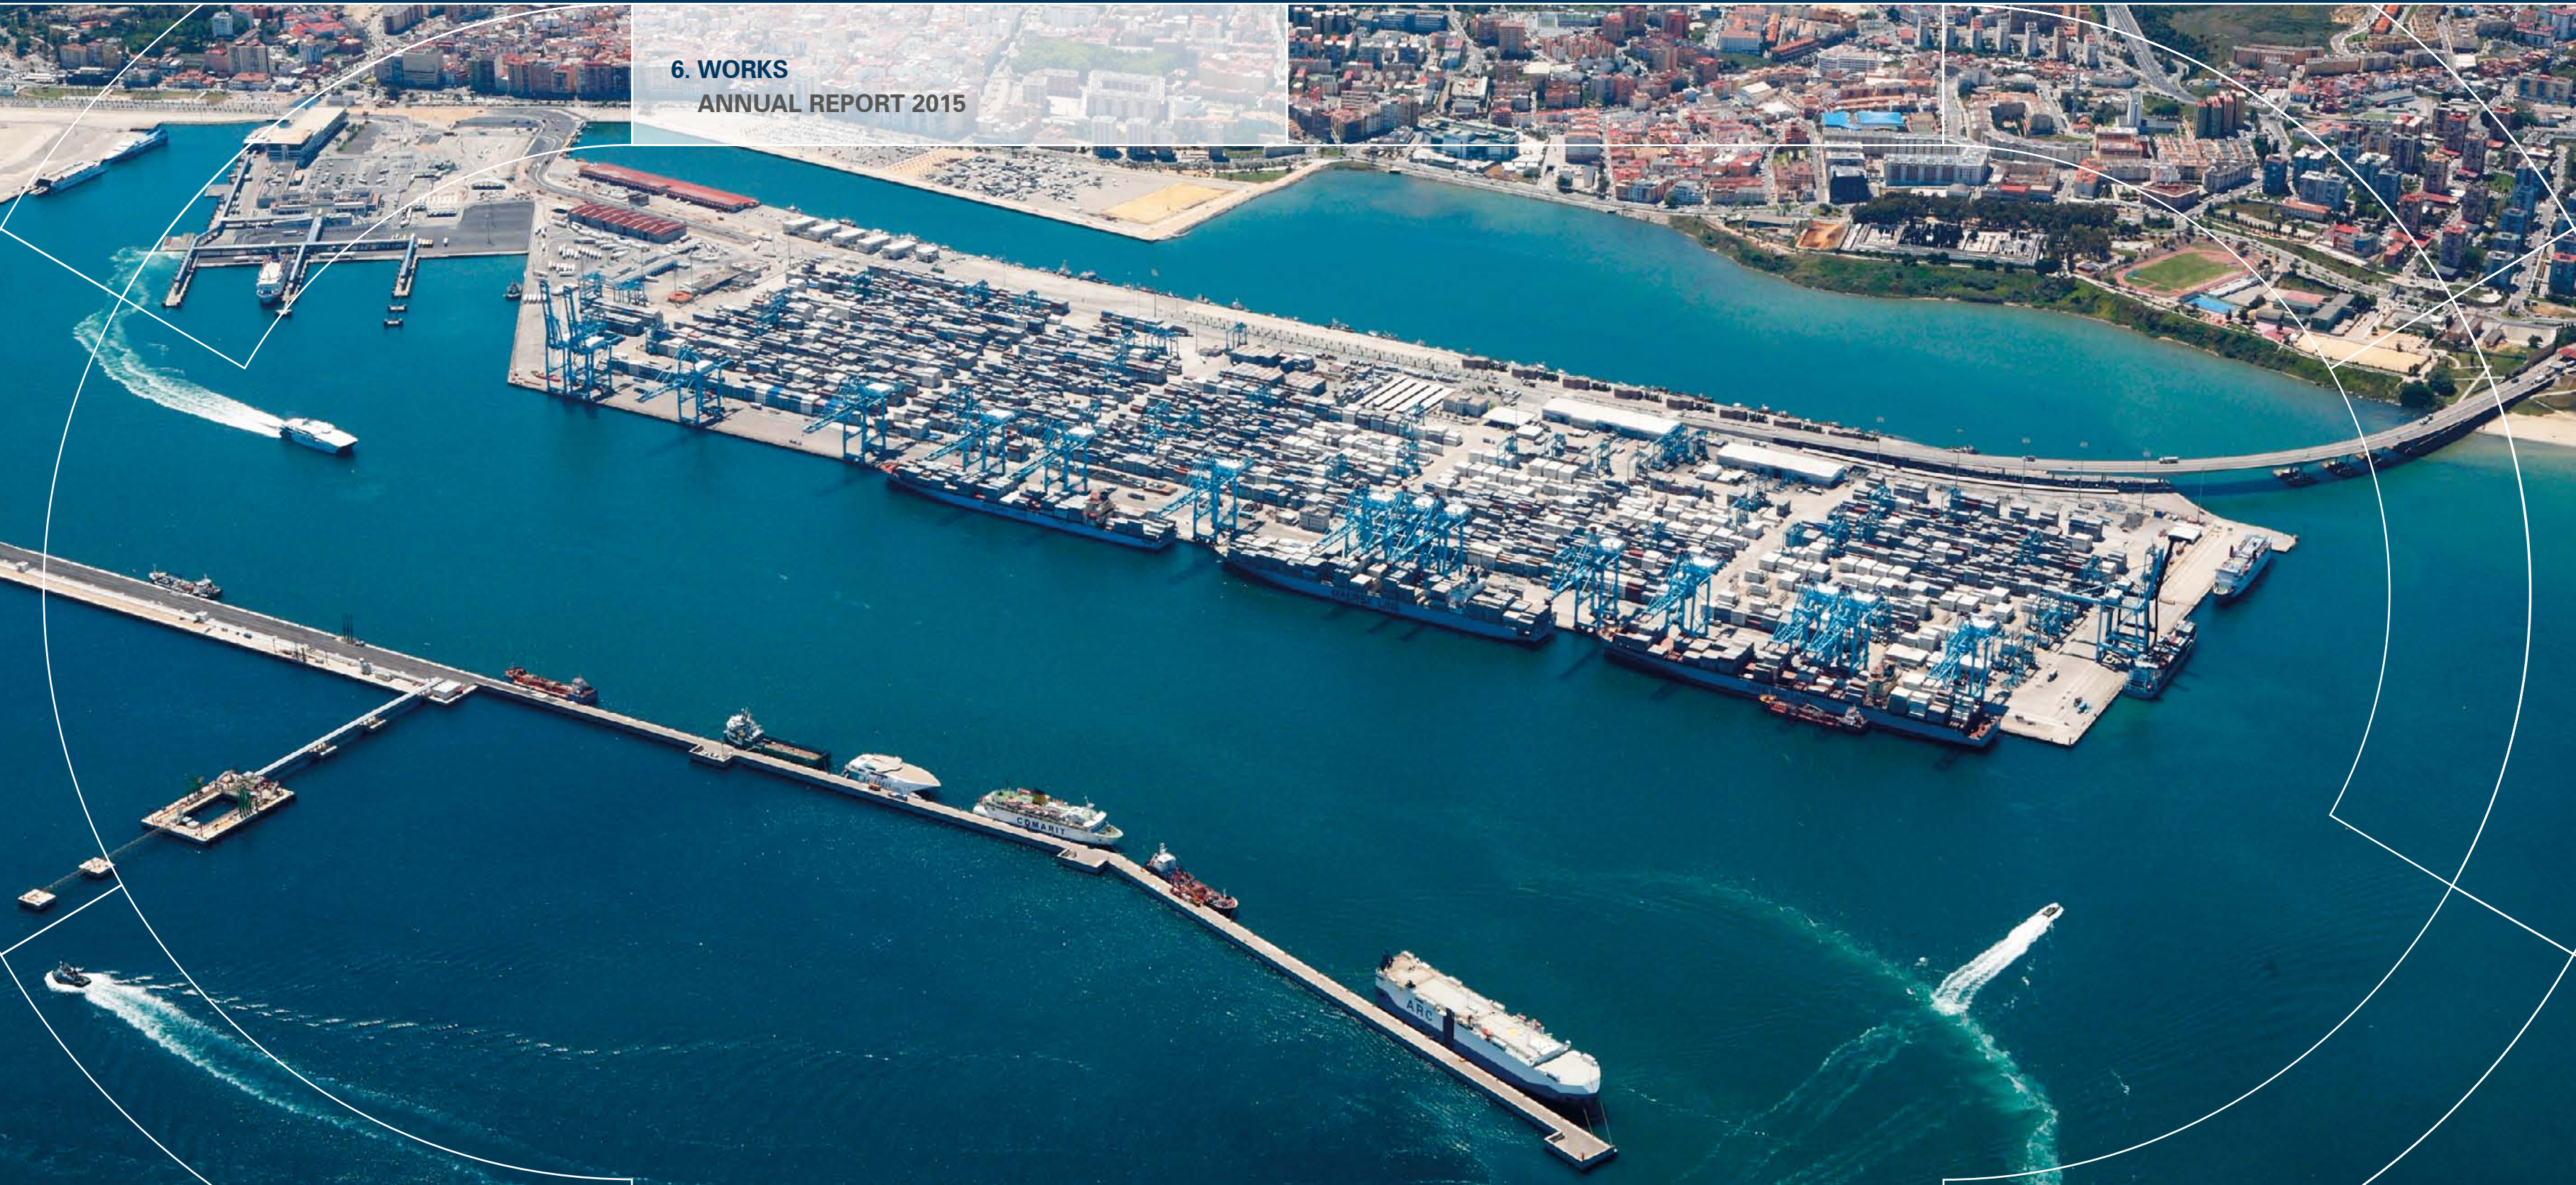

335 linear metres of floating jetties and 313 linear metres of fingers have been installed for leisure boats to berth at the smaller docks at the Port of Tarifa. They have been fitted out with water, electricity and lighting supplies. In total, the Port of Tarifa has been provided with 115 berths for leisure boats.

Project to adapt fire-fighting protection measures at Port of Algeciras Passenger Terminal and embarkment tunnels.

Supplementary works are currently on-going to complement the ones already executed to improve the fire-fighting installations at Algeciras Passenger Terminal; additionally, the embarkment tunnels are being fitted out with fire-fighting systems. We are acting on compartmentalization, evacuation routing, fire extinguishing and the PA system.

6. WORKS
ANNUAL REPORT 2015

6. WORKS
ANNUAL REPORT 2015

6.3 PROJECTS

Drafting of projects, launching of works tenders, supplies and technical assistance studies carried out throughout the year are detailed below; they include only those that exceeded €150,000. In total, 31 such projects were drafted, the most important being:

- Project to alter the top floor, and interior renewal of the roof and façades of the Tarifa Passenger Terminal.
- Project to improve dockside protection in the El Saladillo Marina in the port of Algeciras service area.
- First Phase Complementary Project to build new control facilities at the Central Gate at the Port of Algeciras. Planning of port façade and link to Llano Amarillo promenade.
- Project to arrange the development of the area around the Central Gate, next to Millan Picazo Auditorium at the Port of Algeciras.

- Improvements to fitting-out installations on the Isla Verde Exterior Detached Breakwater.
- Supply and installation of fenders between bollards N° 58-76 on the inner berthline of Ingeniero Castor R. del Valle Breakwater at the Port of Algeciras
- First Phase Technical Assistance to analyse extreme stay conditions of ships berthed at Campamento North Quay: Methodological Development
- Project to replace track and mounting system between bollards N° 20-53 on East Juan Carlos I Quay.
- Technical Assistance for geo-technical research campaign in Phases 4 & 5 of Isla Verde Exterior port expansion work.
- Dredging to improve East Juan Carlos I Quay draft between bollards N° 1-22
