INTRODUCTION

Manuel Morón Ledro
Chairman

FOREWORD FROM THE CHAIRMAN

20

BOARD OF ADMINISTRATION

24

CHAIRMEN AND GENERAL MANAGERS

26

The Port of Algeciras saw out 2016 with 103.2 million tonnes of total cargo throughput, an increase of 5.04% over the previous year.

FOREWORD FROM THE CHAIRMAN

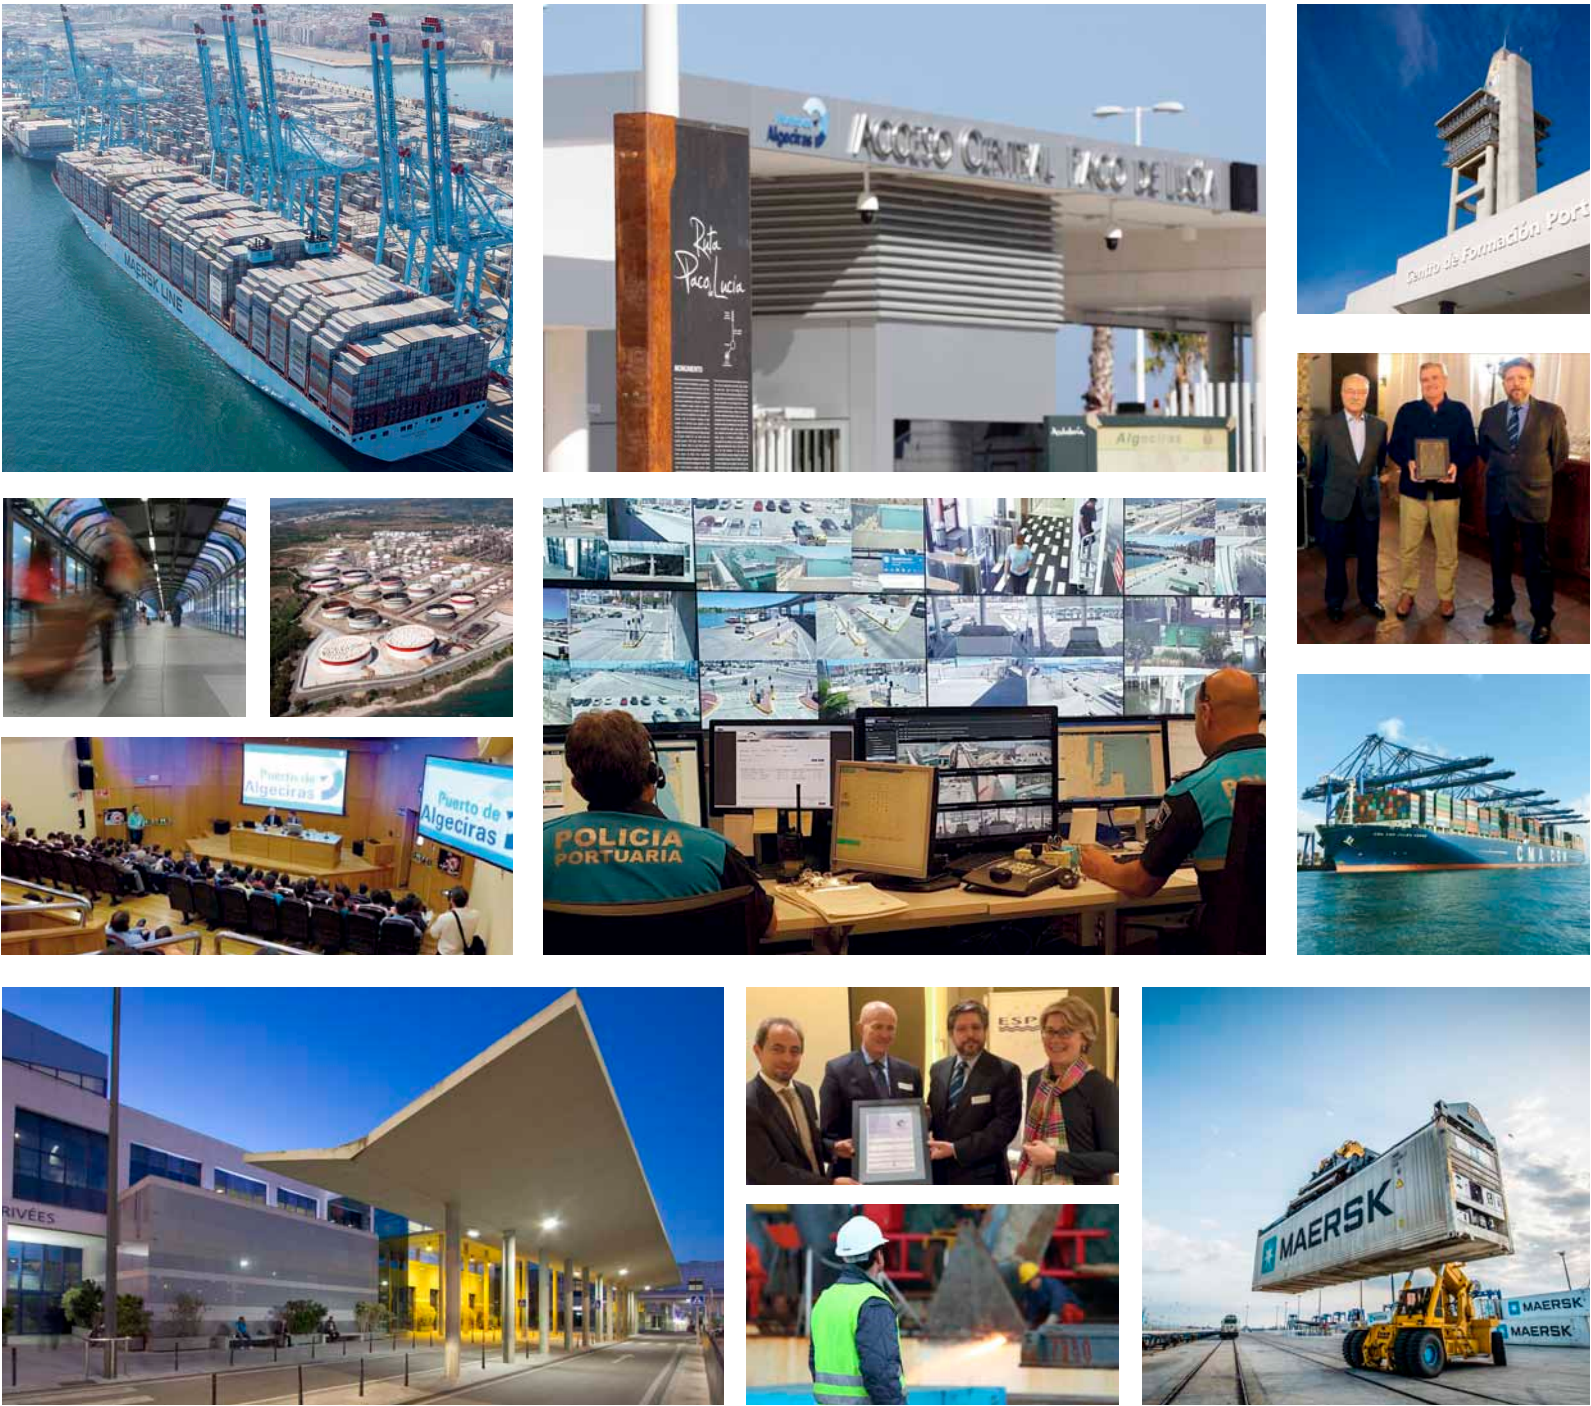

100 million tonnes. A round figure that will live on in the statistical history of the Port of Algeciras.

The record activity reflects the efforts of our workers, companies and institutions on quays that have seen more productivity than anywhere else in the Mediterranean, making our port the second most productive in Europe, as acknowledged by the HIS Markit Group; and a guarantee for placing the port expansion of Isla Verde Exterior – the last available space on the Strait of Gibraltar – on the international market.

It was a year of round numbers all-round that broke through barriers on the Bay’s quays: the 100-plus megaships that called at our container terminals that handled over 4.8 million TEUs; 300,000 HGVs that made use of the Strait’s shipping lines; the 27-million-plus liquid bulks, and the record number of

ship calls. All of the above figures were recorded at the lowest fees for any port in Spain, thanks to our system of fee discounts that our customers profit from. Some of our customers expanded their facilities in 2016, such as Agro Merchants Algeciras; or began to offer new exclusive products tested in Algeciras for the world market, such as Cepsa’s lubricants and fuels, or had anniversaries, such as APMT’s 30th on Juan Carlos I Quay, or our Heavy Industry Association’s 25th.

Last year saw great leaps made on our borders with the outlying towns and cities, such as the opening of our new “Paco de Lucia” Central Gate at the Port of Algeciras, or the on-going work to integrate the Port of Tarifa. Both ports already offer their 5-million-plus customers per year free Wi-Fi at their passenger

Investment in I+D+i allows us to strengthen our port's security.

terminals. The ports are watched over by more than 700 HD cameras: investment in I+D+i has allowed us to reinforce safety and security at our ports, among other aspects.

At the same time, the companies that operate within the Port of Algeciras continue to reduce their labour accident rate and strive to reduce their impact on the environment. These efforts have been acknowledged by ESPO (European Sea-Ports Organization) with the award of a PERS Certification. PERS ratifies a successful implementation of EcoPorts requirements – standards that continually strive to minimize the environmental impact of port business – a premise that is always present in any activity or project carried out at the Port of Algeciras in order to conserve our invaluable surroundings.

More than 100 megaships have called in to our container terminals.

The quays at the Port of Algeciras were the Mediterranean's most productive once again in 2016.

APBA was awarded the 2nd Prize for Port Productivity in London last November.

Our port's activity has also deemed it worthy of prizes and awards at home and abroad.

We received the 2nd Prize for Port Productivity (jointly with Antwerp) in London in November, an award that acknowledges our container quays' productivity rate at Algeciras and given by IHS Dredging & Port Construction Magazine, a journal edited by HIS Markit, the North American specialist port sector analysts.

BOARD OF ADMINISTRATION

MEMBERS OF APBA COUNCIL

Manuel Morón Ledro

Chairman of the Board of Directors
Chairman of the Port Authority

Angel Gavino Criado

Vicepresident of the Board of Directors
Andalusian Government Subdelegate in Campo of Gibraltar

José Luis Hormaechea Escós (*)

Managing Director of the Port Authority

Julio Berzosa Navazo

Algeciras Harbour Master

Javier de Torre Mandri

2.8 BRIEF OVERVIEW OF SPECIFIC TRAFFIC FACILITIES

PASSENGERS

PORT OF ALGECIRAS

FERRY BERTH:

There are eight ferry berths that serve the lines covering the Strait. Passenger transfer is by elevated platforms and walkways that connect the berths with the Passenger Terminal.

PASSENGER TERMINAL:

The main passenger terminal building occupies a 12,000 sqm surface area. The ground floor is for ticket offices, shipping-line offices, shops and institutional offices, together with disembarkment halls. The top floor has embarkment and disembarkment areas and a cafeteria, as well as luggage, passport and ticket control points.

The main shopping area is in the annexe building, which occupies a 7,900 sqm surface area over two storeys. The ground floor is used by travel and forwarding agents and the top floor is used by various forwarders and shipping companies. On the west wing of the building is where we have located our Heliport terminal.

MULTI-STOREY CAR-PARK BUILDING:

This facility is mainly used by passengers travelling to Ceuta or Tangiers and who prefer to leave their cars in Algeciras. The car-park has 810 spaces over 3 floors (180m x 38m). The ground floor is open-plan and is used for arranging embarkment of vehicles onto ferries. The fourth floor is our helipad.

PORT OF TARIFA

BERTH:

There are three berths that are currently being used by fast ferries covering the line to Tangiers.

PASSENGER TERMINAL:

The Passenger Terminal, occupies a 2,116 sqm surface area divided into two storeys. The ground floor is where the ticket-sales premises and shipping-line check-in offices, cafes and official institutions are to be found.

RO-RO TRAFFIC

There are 7 other Ro-Ro ramps (apart from the ones mentioned under the passenger section) with 10.5m draughts located on the following quays: one on Isla Verde with draughts of 10m; one on the Ingeniero Castor R. del Valle Breakwater with draughts of 14.5m; another on Principe Felipe Quay with draughts of 14.5m; and two on Juan Carlos I Quay (one on the North side and one on the South side, with draughts of 9m and 10.5m, respectively). And another two ro-ro berths on Isla Verde Exterior Quay (one with 17.50m drafts on North Quay and another with 18.50m drafts on the Quay adjacent the breakwater).

CONTAINERS

APM TERMINALS ALGECIRAS:

This terminal is located on Juan Carlos I Quay and occupies a 67,1 Ha surface area. It has a 1,941m berthline offering draughts of between 14 and 16m. There are 19 Portainer cranes (8 x 74 tm, 8 x 70 tm, 3 x 65 tm) and 65 transtainers.

TOTAL TERMINAL INTERNATIONAL ALGECIRAS (TTI-A):

This terminal, located on Isla Verde Exterior Quay, occupies a 35.76 Ha surface area. It has a 650m berthline with 18.5m draughts, 8 Portainer cranes and 32 transtainers (40tm).

OIL

SEA ISLAND:

Located at a depth of 60m, allows oil tankers of up to 35,000 -tonne (DW) to be moored, with an unloading capacity of up to 12,000m³/hour. It also has a bunkering facility.

CEPSA'S "GIBRALTAR" OIL REFINERY PIER:

The refinery's distilling capacity is 12-million tonnes of crude per year. At the port facility within the complex, there are seven loading and unloading berths for products (1,467 metres of pier), along with another terminal dedicated exclusively for barge activities. The latter facility has draughts of between 6m and 20m depth, allowing ships of up to 175,000 tonnes deadweight to berth.

COAL

ENDESA GENERACIÓN:

The terminal has more than 700 metres of quayline and excellent facilities for unloading and handling dry bulks. The 360-metre unloading quay has draughts of 23 metres and can accommodate ships of up to 270,000 tonnes DW; the loading quay allows for ships of up to 25,000 tonnes DW to berth. A third berth line can handle ships of up to 60,000 tonnes DW.

STAINLESS STEEL

ACERINOX:

The factory, with its own port facilities to import raw materials and dispatch finished products, has a steel plant production capacity of 1,100,000 tonnes, a hot-rolling capacity of 900,000 tonnes and a cold-rolling capacity of 670,000 tonnes per year. The plant occupies a 125-hectare surface area and its port terminal has a 250-metre quayline with 9.5-metre draughts and two gantry cranes.

WATER

THE ANDALUSIAN MEDITERRANEAN WATER AUTHORITY'S DOLPHINS ARE LOCATED IN PUENTE MAYORGA, NEAR SAN ROQUE:

Berthing system for the loading of water in tankers up to 115,000 TPM, made by berthing and mooring breakwaters.

SPORTS & LEISURE

The El Saladillo Marina in Algeciras offers 900 berths for leisure craft of up to 15 metres length. It occupies 35 hectares that is home to several locally-based sailing clubs that manage the berths under license.

The facility is complemented by Puerto Chico in La Linea de la Concepcion to the North west of the Bay, where other sailing clubs manage 438 berths, and where the Alcaidesa Marina

company has more than 600 more berths on offer for leisure and sports craft of up to 50 metres length with a complete range of landfall, supply and repair services.

At the same time, APBA also manages the Port of Tarifa's 118 berths for boats of between 5 and 11 metres length.

FRESH FISH

PORT OF ALGECIRAS

FISH MARKET:

With a total surface of 8,770 sqm, it is divided in auction areas, circulation and premises run by exporters, shipowners and other activities.

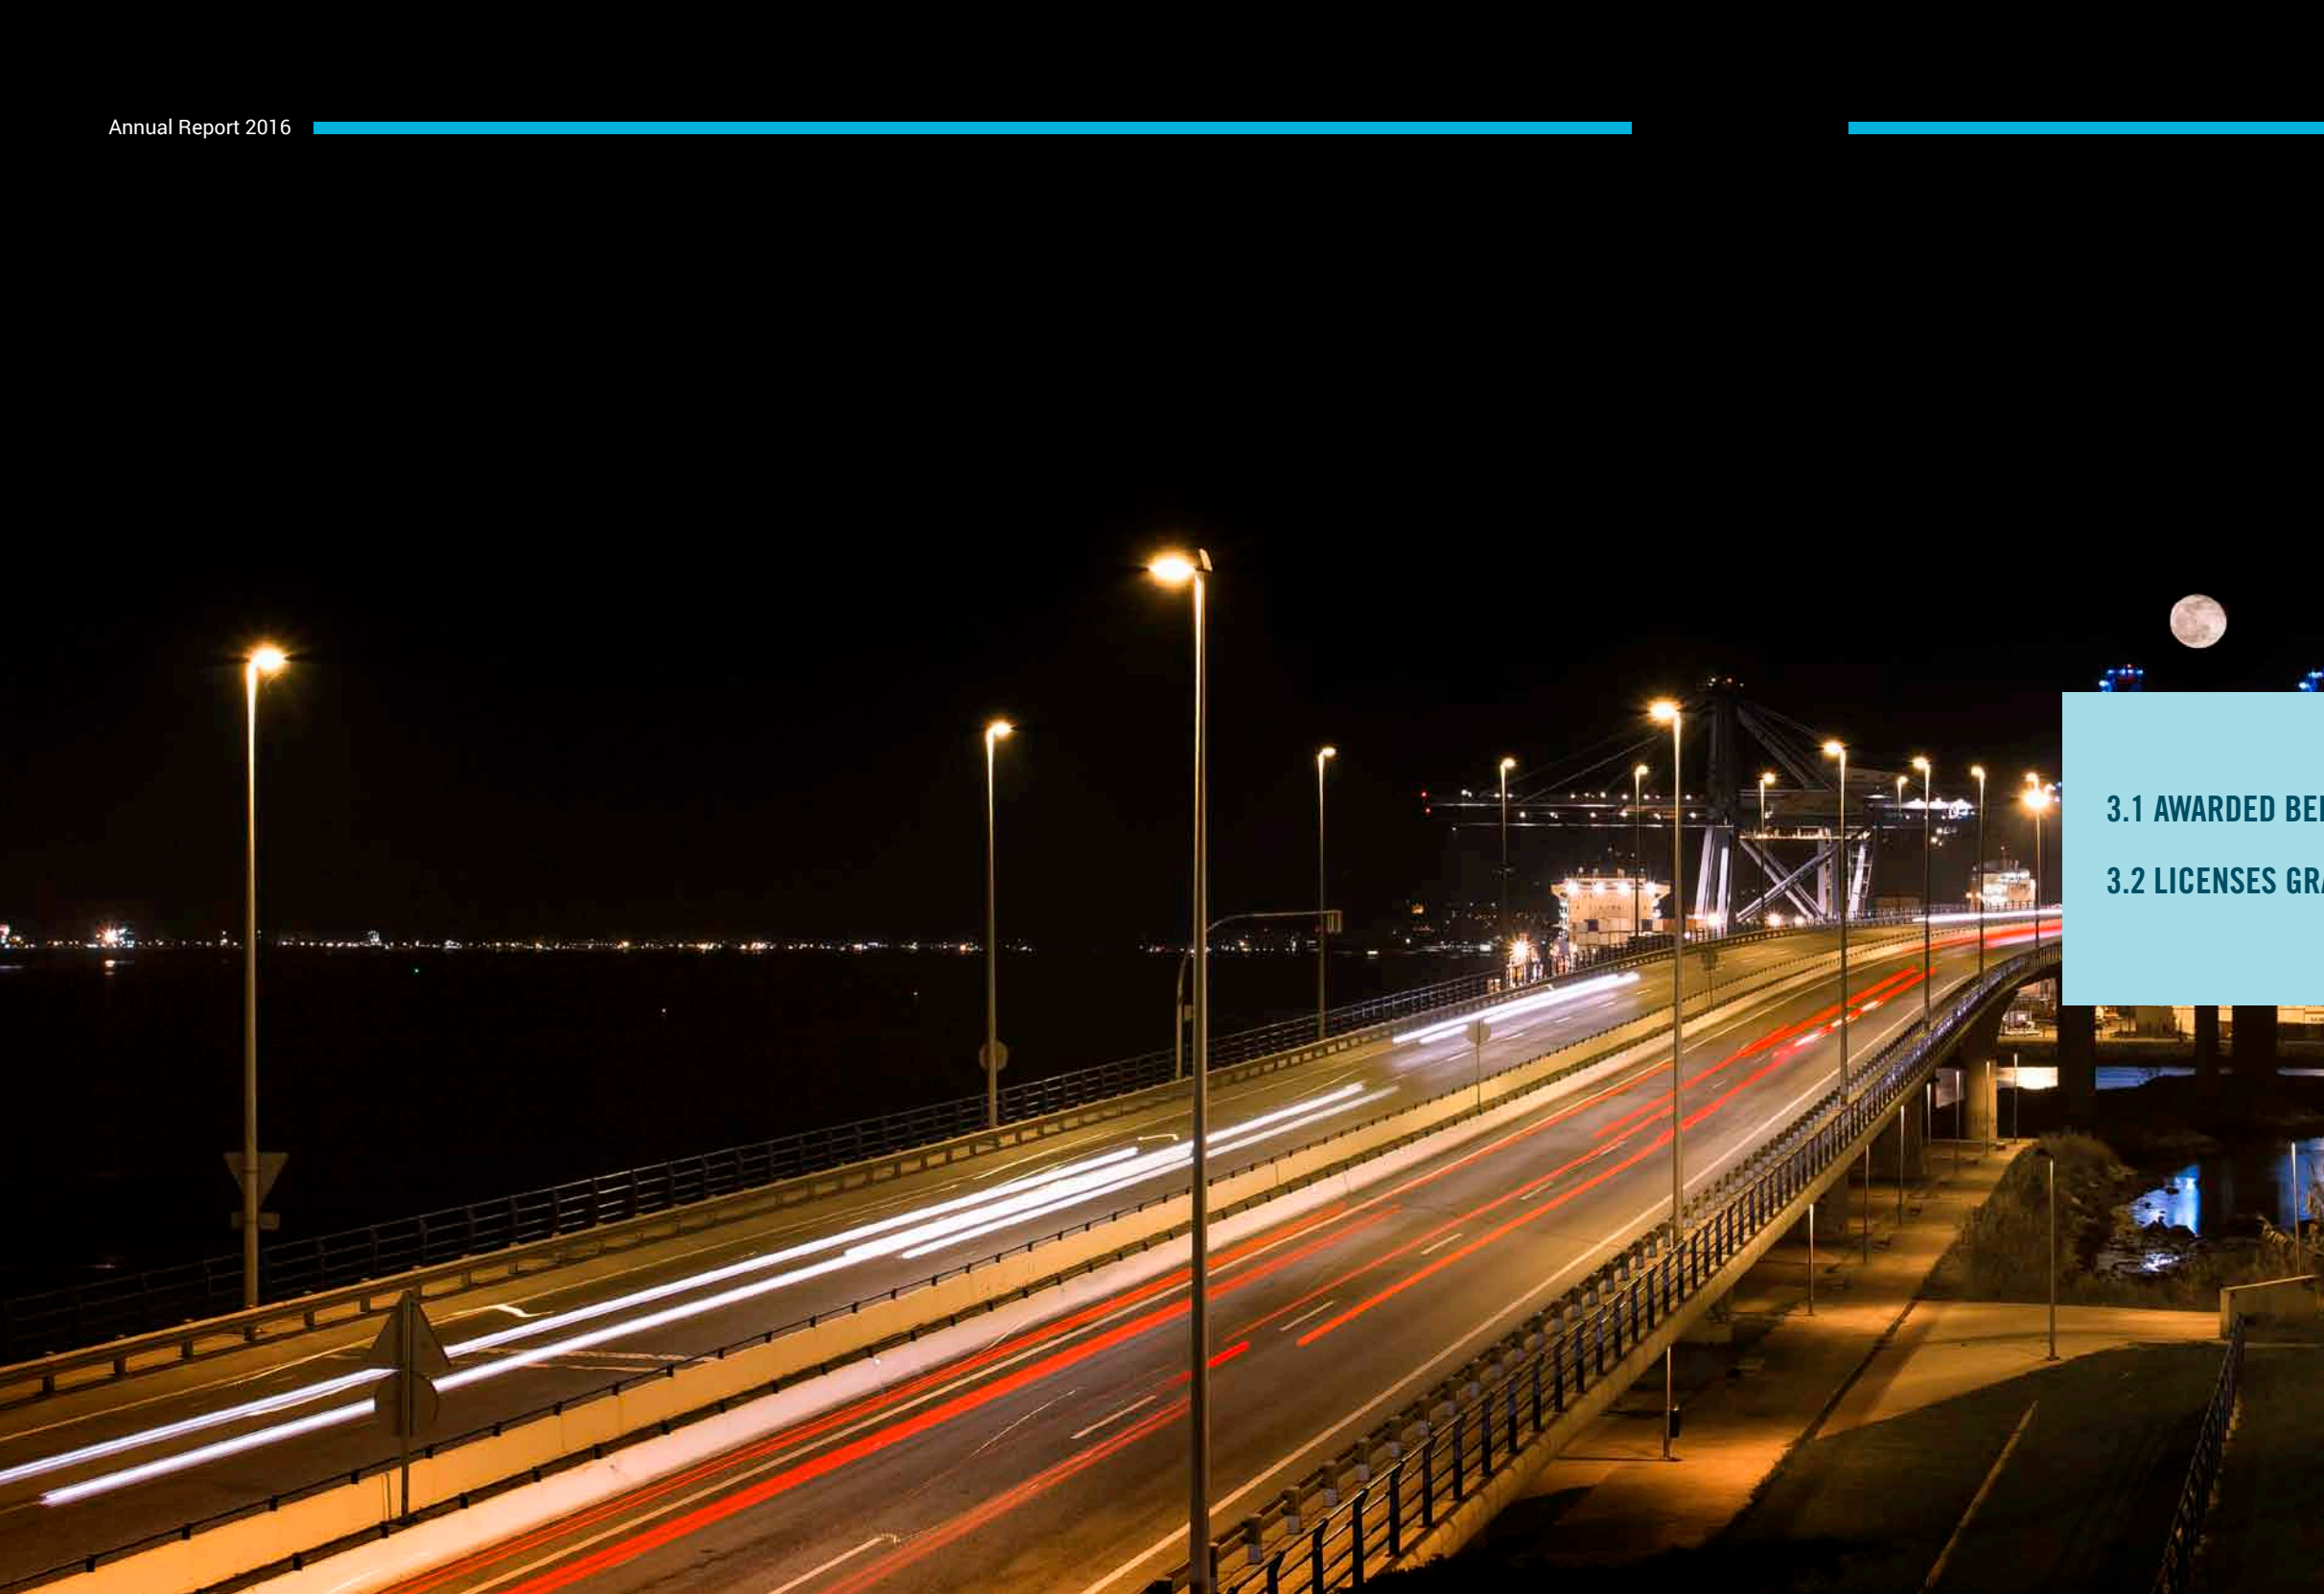

PORT OF TARIFA

FISH MARKET:

The fish market occupies a 1,093sqm surface area, arranged in the same way as the Algeciras market.

6.2 A BRIEF OVERVIEW OF SIGNIFICANT WORKS

HAVING BEEN COMMISSIONED BEFORE 2015, THE FOLLOWING INTERVENTIONS WERE COMPLETED THROUGHOUT THE YEAR 2016, NOTABLY:

- Project to install floating piers for pleasure boats at the Port of Tarifa.
- Project to remodel the boarding tunnels at the Port of Algeciras Passenger Terminal.
- Project to refurbish the vehicle boarding esplanade surfaces at the Port of Tarifa Ferry Terminal.
- Project to execute the refurbishment of warehouse buildings 1, 2 and 3 on the Port of Tarifa Fishing Dock.
- Modification of the project to reorganize the Port of Algeciras Central Gate; basic and execution project for the new control facilities at the Port of Algeciras Central Gate; organization of its façade and connection to the Llano Amarillo Promenade.
- Project to refurbish and integrate the unused port spaces at the Port of Algeciras. 1st Phase: areas next to the transformer and access to APBA Headquarters.

- Draught dredging upgrade down to 17.00 metres between bollards 3 and 22 on Juan Carlos I Quay. These works provide continuity to the foundation reinforcement work of the quay. With the two interventions, this stretch of quay has been adapted to the load-bearing and draughts demanded by the new generation of TRIPLE-E class super containerships.
- Fenders were substituted and installed on the quay edge to improve operations and the state of Juan Carlos I Quay.

A TOTAL OF 13 WORKS WERE STARTED IN 2016. THE FOLLOWING WERE COMPLETED WITHIN THE YEAR:

- Project to renew the water supply network on the interior esplanade of the remodelled Port of Campamento.
- Project to build a new roof for the remodelled Port of Algeciras Passenger Terminal.
- Project to refurbish the ticket sales kiosk access areas, located in the shopping centre at the remodelled Port of Algeciras Passenger Terminal.

- Basic and execution project to remodel the interior of the top floor, and to refurbish roofs and façades, at the Port of Tarifa Passenger Terminal.
- Supplementary project for the reorganization of the new control facilities at the Port of Algeciras Central Gate; organization of its façade and connection to the Llano Amarillo Promenade.
- Extension of North Quay in the Interior Basin at Campamento, San Roque.
- Landscaping work on the stretch of main road between Isla Verde and the Port of Algeciras.
- Upgrade to fitting of equipment on the detached breakwater on Isla Verde Exterior Quay.
- Substitution of the track and its fastening system between bollards 20 and 53 on East Juan Carlos I Quay.
- Access road to the Port of Algeciras Bay facilities in La Linea de la Concepcion (Cadiz). CA-34 (N-351) Road, kilometre 6.930, right-hand side.

STARTED WITHIN 2016:

- Project for renewal of the water supply network on Juan Carlos I Quay at the Port of Algeciras.
- Project for renewal of the water supply network on Llano Amarillo at the Port of Algeciras.
- Project to automate the APBA Headquarters Building lighting system.
- Project to adapt the facilities and spares supply on N°s 1, 2, 3, 4, 5, 6, 7 and 7B moving walkways at the Port of Algeciras Ferry Terminal.
- Project to adapt the fire-fighting protective measures at the Port of Algeciras Passenger Terminal and boarding tunnels.
- Project to execute the 66kv DC high-voltage line from “Cañuelo” to “Isla Verde” sub-stations.
- Project for execution of the “Cañuelo” (formerly “Guadacorte”) sub-station connection and 220kv - 66 kv transformer.
- Project for upgrade of protection elements in the El Saladillo Basin. Port of Algeciras Service Area.
- Extension of North Quay in the Interior Basin at Campamento, San Roque.
- Landscaping work on the stretch of main road between Isla Verde and the Port of Algeciras.

- Upgrade to fitting of equipment on the detached breakwater on Isla Verde Exterior Quay.
- Substitution of the track and its fastening system between bollards 20 and 53 on East Juan Carlos I Quay.
- Access road to the Port of Algeciras Bay facilities in La Linea de la Concepcion (Cadiz). CA-34 (N-351) Road, kilometre 6.930, right-hand side.

THROUGHOUT 2016, A.P.B.A. CONTINUED TO CARRY OUT WORKS AND STUDIES TO PLAN INVESTMENT IN INFRASTRUCTURE AND FACILITIES. THE FOLLOWING ARE THE MOST SIGNIFICANT:

- Geotechnical campaign for a future Ro-Pax terminal.
- Geotechnical campaign for the future development of Isla Verde Exterior.
- Studies for the reorganization of the La Galera and Isla Verde Interior Ferry Terminal at the Port of Algeciras.
- Studies and projects for the reorganization of the South Gate at the Port of Algeciras.

12 WORK SETTLEMENTS HAVE ALSO BEEN CARRIED OUT, NOTABLY:

- Quay reinforcement and draught upgrade on Juan Carlos I Quay between bollards 1 and 22.

- Supply and installation of fenders between bollards 1 and 20 on East Juan Carlos I Quay at the Port of Algeciras.
- Refurbishment of the Ingeniero Castor R. del Valle Breakwater access road.
- Project for street lighting on the Isla Verde Interior Quay.
- Settlement of the works corresponding to the project for street lighting of quay edges at Campamento.
- Settlement of the works corresponding to the project to install water and electricity supply blocks at Campamento.
- Settlement of the works corresponding to the project to repair four (4) of the boarding and disembarking moving walkways for Ceuta and Tangiers at the Port of Algeciras Passenger Terminal, due to the storms in 2013: in January (18-20) and March (1st to 8th), as per phase.
- Settlement of the works corresponding to the modifications of the project to remodel the “Kursaal” transformer station and the Isla Verde 15kv mid-voltage grid at the Port of Algeciras.
- Settlement of the works corresponding to the project to renew the water supply network on the interior esplanade at the Port of Campamento.
- Settlement of the works corresponding to the project to install floating piers for pleasure boats at the Port of Tarifa.

Brief overview of Significant Works:

PROJECT TO REMODEL THE BOARDING TUNNELS AT THE PORT OF ALGECIRAS PASSENGER TERMINAL.

The aim of the project was to remodel the fixed walkways connecting Algeciras Passenger Terminal with ferries and vice-versa. This has fundamentally implied:

Executing new porcelain stoneware tiling floors to replace the rubber button flooring that had been damaged from intensive use.

Changing the roofing sandwich boarding, changing the interior polyurethane panels for rock wool panelling, better thermal insulation and solving problems caused by water leakages.

Installing stainless steel doors and glass panes with special heat-insulating properties. This has allowed us to close the boarding walkways off and avoid rainwater leaking through.

Upgrading and refurbishing the lighting. Installing air extractors and impellers to improve the conditioning inside the walkways.

Painting both the metallic structure and panelling of all the walkways in white polyurethane, thus improving their ambient light.

PROJECT FOR RENEWAL OF THE WATER SUPPLY NETWORK ON JUAN CARLOS I QUAY AND RENEWAL OF THE SUPPLY NETWORK ON EL LLANO AMARILLO AT THE PORT OF ALGECIRAS.

These two projects aimed to substitute old fibre-cement drinking water supply network piping, that had a great amount of leakage because of ageing, with new cast and polythene piping of a smaller diameter that should reduce the amount of leaks considerably.

PROJECT TO EXECUTE THE 66KV DC HIGH-VOLTAGE LINE FROM “CAÑUELO” TO “ISLA VERDE” SUB-STATIONS, CONNECTION OF “CAÑUELO” (FORMERLY “GUADACORTE”) SUB-STATION AND 220KV - 66 KV TRANSFORMER.

Works continue on the electrification of Isla Verde Exterior that began in 2009 by means of an agreement with the electricity distribution company, and that - once completed - will provide the Port of Algeciras with a total of 78 MVA.

**REMODELLING OF THE TOP FLOOR INTERIOR AND
REFURBISHMENT OF ROOFS AND FAÇADES OF TARIFA
PASSENGER TERMINAL.**

The projected interior refurbishment of the top floor of Tarifa Passenger Terminal fundamentally affects its distribution use and dimensioning.

The APBA work area was gleaned from the current Port Police offices. These offices retain the same location but with a slightly lesser surface area. It has been provided with an archive space and has work stations separated by screens: one for the Head of the Port Police and the others for the Port Police Officers.

There is then an office for the APBA Manager, provided with an anteroom for a clerk. From here, there is an office available to APBA, a multi-functional classroom and a VIP room in that order.

The Pilots' area has remained in the same place, but expanded to provide it with an archive space between the Pilots' offices and the bathroom, which has also been enlarged. Next to the Pilots' area there is a space for changing rooms and bathrooms.

The new National Police changing rooms has 84 lockers and is next to the Pilots' area with access from the hall via staircase E-2.

Adjacent to this, there is a Port Police ladies' changing room, with 8 lockers, as well as the general bathroom space on this floor. On the other side of the interior corridor is the Port Police men's' changing room (in the space currently occupied by the X-Ray waiting room). The X-Ray area includes an X-Ray room, a nurse station and a waiting room.

Finally, there is an installations rooms that closes the top floor of the building towards the East provided with premises for storing maintenance equipment.

The original façade of the building - above all, on the top floor to be remodelled - keeps its current character and aesthetics. It will, however, be thoroughly treated for cracks, repaired and cleaned.

The roofs of the original Passenger Terminal building will also be given special attention. Its ground floor roof is to be waterproofed, keeping both its inverted roof aesthetic and maintenance walkways. The existing roof skylights are to be renewed, replacing the current zinc enveloping type for new ones, as well as the glazing itself.

The top floor roof is to be completely refurbished, replacing the present curved layout with a straight layout and a uniform slope. It is to be given a second interior guttering, located approximately half-way along the main gable, with lateral down-pipes.

Cladding is once again to be carried out in zinc - specifically 0.8mm Quartz Zinc Plus - executed via an elevated joint system over a ventilation membrane and water-repellent panelling.

**PROJECT FOR THE ORGANISATION AND URBAN
DEVELOPMENT OF THE FISHING PREMISES AT THE PORT
OF TARIFA (2ND PHASE).**

Location of the works is in the fishing premises at the Port of Tarifa, a Port of Algeciras Bay Authority service area, although - due to the fact that some of the works are located on the port enclosure - some small areas bordering the outer edge of the

Port of Tarifa's land service line enclosure on Calle Alcalde Juan Nuñez will be affected. The works executed outside the service area have been valued in a separate chapter of the budget as costs.

The works involved in the project are to complete the road connection by means of the esplanade created by the vacation and demolition of the old slipway facility and continue on from the organization and urban development executed during the 1st Phase throughout the fishing premises at the Port of Tarifa in 2006.

Said road will provide new internal communications within the port between the commercial zone, where the Passenger Terminal is located, and the fishing premises at the Port of Tarifa.

Apart from the roads, the project also involves carrying out the works to complete the enclosure of the whole port premises, together with creating adjacent pavements along the stretch of road along Calle Alcalde Juan Nuñez; and the refurbishment of the gateway to the fishing premises and other interventions required to reorganize the Port of Tarifa to make it function more effectively.

**EXTENSION OF NORTH QUAY IN THE INTERIOR BASIN AT
CAMPAMENTO, SAN ROQUE.**

The first stretch of dredging has progressed over the year; dredging and anchoring the caissons that make up the gravity wall body are still outstanding. The quay is set to be prepared as a dam in case the current basin is to be used as a large-scale dry dock.

**LANDSCAPING WORK ON THE STRETCH OF MAIN ROAD
BETWEEN ISLA VERDE AND THE PORT OF ALGECIRAS.**

The civil works were completed in 2016, leaving the issues regarding gardening to be resolved in early 2017: this is probably the ideal season to plant the chosen species.

**UPGRADE TO FITTING OF EQUIPMENT ON THE DETACHED
BREAKWATER ON ISLA VERDE EXTERIOR QUAY.**

The project included the upgrade to services. Works executed in 2016 were basically the following:

- The repair and sectorization of the water supply and fire-fighting network.
- Remodelling of the water service supply joints on breakwater and quay capping beams.
- Repair of existing damage on the interior facings of the sea wall, and rectification and painting of bollards.

**SUBSTITUTION OF THE TRACK AND ITS FASTENING
SYSTEM BETWEEN BOLLARDS 20 AND 53 ON EAST JUAN
CARLOS I QUAY.**

Replacement of the existing track-fastening system and rails for Super Post-Panamax cranes with a greater capacity load-bearing set on a 1,850-linear-metre stretch of East Quay on the Juan Carlos I container terminal at the Port of Algeciras.

The new fastening system is to be made up of anchoring bolts, a metal supporting base plate for the rails, screws, fishplates and levelling resin, completing the system with A-120 / 110 Cr-V rails.

**ACCESS ROAD TO THE PORT OF ALGECIRAS BAY
FACILITIES IN LA LINEA DE LA CONCEPCION (CADIZ).
CA-34 (N-351) ROAD, KILOMETRE 6.215 TO 6.930,
RIGHT-HAND SIDE.**

The works executed in 2016 consisted of the preparation for civil works required to execute an exclusive lane on the road to access the Port of La Linea de la Concepcion.

Routing of the exclusive lane is to be performed parallel to the current access lanes on the road to Gibraltar, along the Promenade Road. Excavations have been made to improve the road bed, along with the execution of sewage drains to evacuate run-off waters, and deepening of existing utility boxes.

The urban development of the area is to be completed with the execution of a stretch of cycle-path and a parallel pedestrian pavement.

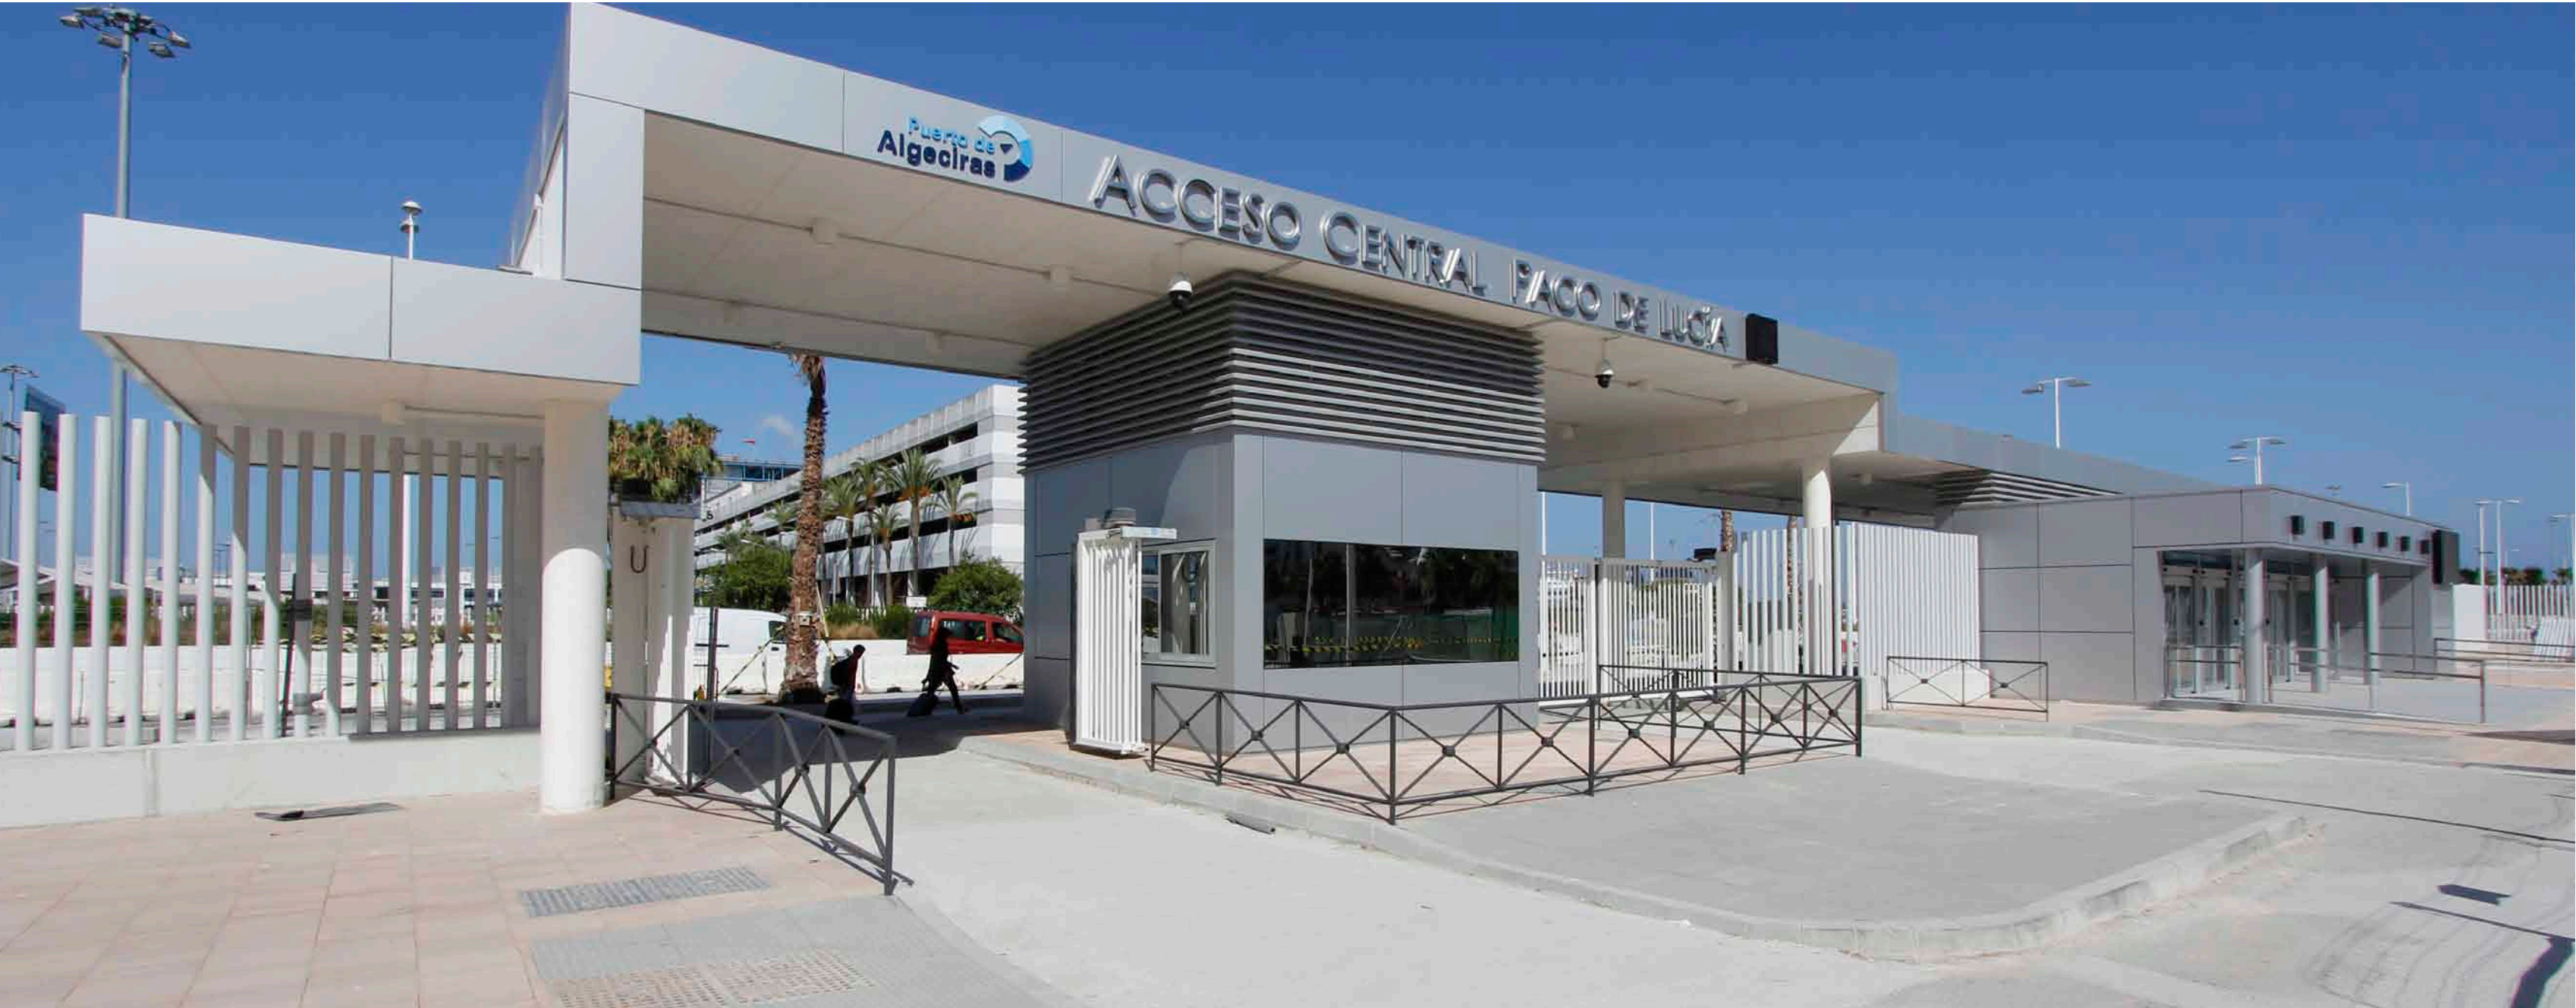

6.3 PROJECTS

Drafting of projects, tenders for basic works, supplies and technical assistance studies undertaken throughout the year are detailed in the breakdown below (those included are the ones with a value over €150,000). In total, 32 were drafted:

- Modification of the basic and execution project for the new Port of Algeciras Central Gate control point facilities, arrangement of its façade and connection with El Llano Amarillo Promenade.
- Project for refurbishment and integration of unused port spaces at the Port of Algeciras. 2st Intervention: interior areas next to the Oasis and fishing dock (1st Phase).
- Project to reinforce the direction and information sign structures from the general road network to the ports of Campamento, La Linea de la Concepcion and Tarifa; and updating of the study carried out for the Port of Algeciras.
- Project to execute the refurbishment of the outside of Port of Tarifa’s fish-market building.
- Supplementary works project for the project to reorganize and develop the fishing premises at the Port of Tarifa (2nd Phase).

- N°1 Modification Project to reorganize and develop the fishing premises at the Port of Tarifa (2nd Phase).
- Project to execute exterior urban development works and refurbishment of the slipway next to the Marine Civil Guard Headquarters in Algeciras.
- Reinforcement of all faces of the dissipation windows exposed to waves on the Isla Verde Exterior detached breakwater sea-wall.
- Reorganization of the rolling cargo and Schengen areas on Isla Verde Quay (Phase I).
- Reorganization of Port of Algeciras South Gate and “El Saladillo” Marina basin (Phase I). Land-fill and rerouting of access roads.
- Removal work and relocation of seasonal sand drifts in the River Guadarranque River estuary.
- Refurbishment of N° 1 Quay at the Port of Tarifa.
- Project to repair N° 9 fender located on La Galera Quay N° 4 berth at the Port of Algeciras.

- Project to refurbish fire-fighting equipment in the new APBA Headquarters in Algeciras.
- Project to upgrade the 15kv underground mid-voltage lines between North Quay I and North Quay II transformer stations in the vicinity of Isla Verde at the Port of Algeciras.
- Project to refurbish the air-conditioning vertical conduits and forced air and extraction ducts, and execution of a protective tower at the new Port of Algeciras Passenger Terminal.
- Modification of the Project to remodel the boarding tunnels at the Port of Algeciras Passenger Terminal.
- Modification of the Agreement between APBA and Endesa Distribucion Electrica to build a power supply line and an electrical sub-station to regulate the electrical infrastructure on the Isla Verde Exterior development at the Port of Algeciras.
- Project to reinforce the direction and information sign structures from the general road network to the ports of Campamento, La Linea de la Concepcion and Tarifa; and updating of the study carried out for the Port of Algeciras.
- Project to execute the refurbishment of the outside of Port of Tarifa’s fish-market building.
- Project to execute exterior urban development works and refurbishment of the slipway next to the Marine Civil Guard Headquarters in Algeciras.

An aerial photograph of a coastal city and harbor. The harbor is filled with blue water and several ships. The city is built on a peninsula, with a large industrial area on the left and a residential area on the right. A river flows through the city, and a bridge crosses it. The sky is clear and blue.
