MANAGING DIRECTORS

0 FOREWORD FROM THE CHAIRMAN

MANUEL MORÓN LEDRO
CHAIRMAN

The year 2017 has been for the Port of Algeciras an exercise in business consolidation. We have consolidated the high volume of traffic reached in 2016, once again manipulating more than 100 million tonnes of total cargo throughput and 4.4 million of TEUs. These figures, nevertheless, indicate a decrease of -1.57% and -7.80% respectively, caused by various difficulties faced throughout this period.

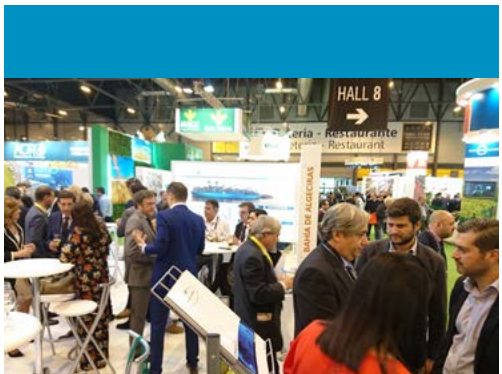

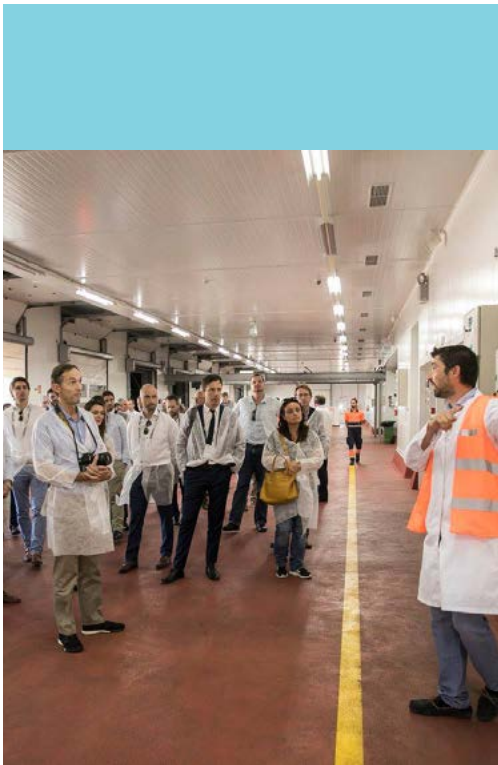

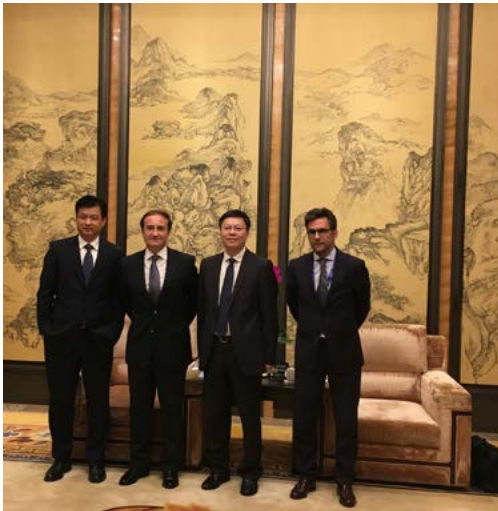

In parallel, updated data that takes into account the economic impact, shows an increase of 23.7% in employment generated by port activity over the last decade, reaching 28,170 workers. This figure represents 7.7% of the employment in the province of Cadiz. This is, without a doubt, the best outcome the Port of Algeciras can show to the community, the true motivation behind our work and effort, our projects and initiatives. An example is the layover of mega-ships, possible today thanks to forward-looking long term investments made years ago, preparing the harbour for giant ships that did not yet exist. Thus, in 2017 we welcomed the arrival of mega-ships to the container terminals of 'APM Terminals Algeciras' and 'Total Terminal International Algeciras' (TTI), at the quays 'Juan Carlos I' and 'Isla Verde Exterior' respectively. This surpassed the one hundredth mark for vessels with a capacity of more than 16,000 TEUs from the three main international shipping companies: Maersk, MSC and CMA-CGM.

These figures must continue to increase, in order to offer new jobs to our neighbours who rely on the Port of Algeciras Bay as a valued asset. To do so, representatives of the port travel the world tirelessly in search of clients, offering them one of the most productive ports on the continent, one with the lowest rates in the country, as shown by economic indicators. These factors are at the root of last quarter's results, a period during which, as unveiled by the consultancy firm Drewry, the Port of Algeciras was ranked 2nd in the world, only behind Singapore, with the most increased maritime connectivity. The port entered, for the first time ever, the top 20 'world's best connected ports' list, rising from rank 25 to 18, a ranking topped by the giant port of Shanghai.

With this in mind, we should not forget other important factors, one of which is the environment. This factor is present in each and every one of the initiatives undertaken by the Port of Algeciras Bay Authority (APBA), and the reason why many of these are modified or even completely discarded. The clearest example is the expansion of the Natural Reserves of the Strait boundaries, upon the initiative of the APBA itself, even when until recently, an expansion of the port was to be carried out. The second factor is innovation, one of the most motivating challenges facing the economy in general, and the port sector in particular. In 2017 we started the second phase of project 'Algeciras BrainPort 2020', a project which cascades down all our activities and especially affects tasks such as port security and safety or environmental preservation. Here, our teams work hand in hand with other ports of reference such as Rotterdam or Singapore. We seek to introduce this innovative culture in all aspects of port activities and to pass this on to the companies that operate within. All ideas are welcome and the best will be implemented and rewarded.

2.5.2. SPECIAL LOADING AND UNLOADING FACILITIES

Location	Owner	Year Built	Characteristics
"Gibraltar" Oil Refinery Pier	Cía. Española de Petróleos, SA (CEPSA)	1966	20 hydraulically-articulated loading/unloading arms with pipelines to storage tanks; 6 manually-articulated loading/unloading arms. Installation can be used for any Re nery product. facility capacity dependent on pumping capacity of tankerships. Maximum admitted pipe pressure: 150lb/inch.
Bay of Algeciras	Cía. Española de Petróleos, SA (CEPSA)	1976	Sea island to unload crude from VLCCs, etc.
Puente Mayorga dolphins	Dirección General de la Cuenca Mediterránea Andaluza	1981	2 x 12-inch water-loading points. Flow: 5760 Tm/h.
Endesa-Puertos facility	Endesa Generación, SL	1984	1 x 1,500 Tm/h (max) continuous loading gantry crane. 1 line of 4,500 Tm/h (max) conveyor belts for unloading. 1line of 1,500 Tm/h (max) conveyor belts for loading.
Endesa-Puertos facility	Holcim España, SA	2009	2 loose cement unloading points and pipeline to storage silos. Unloading capacity: 200 Tm/h.
Ingeniero Castor R. del Valle breakwater	Compañía Logística de Hidrocarburos CLH, SA	2012	3 refuelling/defuelling pipes, each with a 750 MT/h capacity.
Ingeniero Castor R. del Valle breakwater	Compañía Logística de Hidrocarburos CLH, SA	2012	3 10-inch refuelling/defuelling folding arms connecting with 4 pipes for IFO and Gasoil. 8kg/csqm maximum working pressure and a 3,000 MT/h ow.
Explanada Isla Verde Exterior	Vopak Terminal Algeciras, SA	2013	Hub Distribution. Petrol product storing facilities: 22 tanks ranging from 2,000 to 40,000 cubic metres. Dock (25 metres in draught) providing access to vessels and barges.

2.8 BRIEF OVERVIEW OF SPECIFIC TRAFFIC FACILITIES

PASSENGERS

PORT OF ALGECIRAS

BERTHING FOR FERRIES:

There are eight berths for ferries serving the lines of the Strait Algeciras-Ceuta-Algeciras and Algeciras-Tanger Med-Algeciras. The movement of passengers is through platforms and elevated quaysides that link the berths with the maritime station. For passengers who boarded with their vehicles, there are also spaces and specific areas equipped with the required services.

MARITIME STATION:

The main building of the passenger terminal has a total area of 12,000 m2. The ground floor is dedicated to ticket sales, shipping offices, commercial premises and official agency offices, as well as arrival lounges. The upper floor is destined to cafeteria, baggage control, passports and boarding rooms.

It has an annexed building, intended for business areas and amenities, which has a total area of 7,900 m2 distributed on two floors. The ground floor houses the offices of travel agencies and shipping companies. The upper floor is occupied by the offices of freight forwarders and shipping companies. The Heliport Terminal managed by AENA is located in the west wing of the building.

MULTISTOREY CAR PARK:

To be used by passengers travelling to Ceuta and Tangier and leaving their cars in Algeciras. The parking lot has a capacity of 810 cars, distributed on 3 floors of 38 x 180 meters. The ground floor is open-plan and is used for the ordering of vehicles boarding the ferry. The helipad is located on the fourth floor of the building.

PORT OF TARIFA

BERTHS:

There are two berths currently used by high-speed boats that cover the Tarifa-Tangier City-Tarifa line.

MARITIME STATION:

The maritime station has a total area of 2,116 m2, divided into two floors. On the ground floor are located the premises for the ticket office and check-in of shipping companies, cafeteria and official agencies. The upper floor is also occupied by agency offices.

RO-RO TRAFFIC

There are 7 RO-RO berths, in addition to the 8 quoted in the passenger section, with a draught of 10.5 m and located at the following quays: one in Isla Verde with a draught of 10 m, one in Dique Ingeniero Castor R. del Valle with 14.5 meters of draught , another in Principe Felipe with a draught of 14.5 feet, two in the Juan Carlos I Quay (one in the north and the other in the south with 9 and 10.5 meters of draught respectively) and other two RO-RO berths in the Isla Verde Exterior Quay (one in the North Quay with 17.5 meters of draught and another on the attached to the seawall quay with 18.50 meters of draught). These berths serve RO-RO ships that cover the lines Algeciras-Ceuta and Algeciras-Tanger Med as well as other occasional lines like the one currently connecting with the ports of Mauritania.

CONTAINERS

APM TERMINALS ALGECIRAS:

This terminal, located on the Juan Carlos I Quay, occupies an area of 67.1 hectares. It has 1,941 linear metres of berthing with 16 to 18 m. of draught. 19 portainer cranes (8 x 74 tm, 8 x 70tm, 3 x 65 tm) and 65 transtainers service this terminal.

TOTAL TERMINAL INTERNATIONAL ALGECIRAS (TTI-A):

This terminal, located on the Isla Verde Exterior Quay, occupies an area of 35.76 hectares. It has 650 m of berthing with 18.5 m of draught. 8 65tm portainer cranes and 32 40tm transtainers service this terminal.

OIL

SINGLE-BUOY:

Located at a depth of 60m, allows oil tankers of up to 35,000 -tonne (DW) to be moored, with an unloading capacity of up to 12,000m3/hour. It also has a bunkering facility.

CEPSA'S “GIBRALTAR” OIL REFINERY PIER:

The refinery’s distilling capacity is 12-million tonnes of crude per year. At the port facility within the complex, there are seven loading and unloading berths for products (1,467 metres of pier), along with another terminal dedicated exclusively for barge activities. The latter facility has draughts of between 6m and 20m depth, allowing ships of up to 175,000 tonnes deadweight to berth.

COAL

ENDESA GENERACIÓN:

The terminal has more than 700 metres of quayline and excellent facilities for unloading and handling dry bulks. The 360-metre unloading quay has draughts of 23 metres and can accommodate ships of up to 270,000 tonnes DW; the loading quay allows for ships of up to 25,000 tonnes DW to berth. A third berth line can handle ships of up to 60,000 tonnes DW.

STAINLESS STEEL

ACERINOX:

Its factory has its own port facilities for the importation of raw materials and for the dispatch of finished products, with a production capacity of 1.1 million tonnes per year in steelworks, 900,000 tonnes of hot rolling and 670,000 tonnes of cold rolling. It occupies a total area of 125 hectares, and its terminal has 250 meters of quay with 9.5m of draught, as well as two gantry cranes.

WATER

THE ANDALUSIAN MEDITERRANEAN WATER AUTHORITY'S DOLPHINS ARE LOCATED IN PUENTE MAYORGA, NEAR SAN ROQUE:

Berthing system for the loading of water in tankers up to 115,000 TPM, made by berthing and mooring breakwaters.

SPORTS & LEISURE

The El Saladillo marina in Algeciras offers more than 900 berths for recreational boats of up to 15 meters in length and extends over 35 hectares, where the different yacht clubs of the city are located. The latter manage the berths under a concession system.

These facilities are complemented with the ones of Puerto Chico at La Línea de la Concepción, in the north-east area of the bay, where the yacht clubs manage 438 berths. The company Alcaidesa Marina has 624 berths for recreational and sports boats of up to 50 meters in length and provides docking, provisioning and repair services.

Moreover, the APBA manages within the port of Tarifa 118 berths for lengths between 5 and 11 meters.

FRESH FISH

PORT OF ALGECIRAS

FISH MARKET:

With a total area of 8,770 m2, it is divided into auction and transit areas, exporters and shipowners premises and others.

PORT OF TARIFA

FISH MARKET:

The fish market occupies a 1,093 sqm surface area, arranged in the same way as the Algeciras market.

A large, white, stylized number '3' is positioned on the left side of the image. A thin white horizontal line extends from the right side of the number towards the right edge of the image.

6.2 A BRIEF OVERVIEW OF SIGNIFICANT WORKS

During 2017, the following actions which were started in 2016 were completed:

- Landscaping project of the branch of Isla Verde Quay leading to the main road of the Port of Algeciras.
- Project to replace the rail and mounting system between bollards 20 and 53 of Juan Carlos I Quay East.
- Access road project to the facilities of the Port of Algeciras Bay Authority from la Línea de la Concepción (Cádiz). CA-34 (N-351) kilometre marker 6 + 215 to 6 + 930, on the right bank.
- Project for the improvement of facilities on a detached breakwater, Isla Verde Exterior.
- Phase 2 of a project of complementary works for the management and urbanisation of the fishing grounds of the port of Tarifa.
- Protection improvement project in El Saladillo basin, Algeciras Port service area.
- Phase 2 of a management and urbanisation project of the fishing grounds of the port of Tarifa.
- Project to upgrade the installations and supply of spare parts of the telescopic gangways N ° 1, 2, 3, 4, 5, 6, 7 and 7b at the ferry terminal of the Port of Algeciras.
- Project of renovation of the supply network in the Llano Amarillo zone of the Port of Algeciras.

Of the works started in the year 2017, the following were completed in the same year:

- Project for the installation of new ticket verification booths for departures to Ceuta and Tangier.
- Refurbishment and integration project of unused port spaces in the Port of Algeciras. 2nd phase involving the interior space annexed to the oasis and the fishing pier.
- Project to upgrade the installations and supply of spare parts in the telescopic gangways N ° 1, 2, 3, 4, 5, 6, 7 and 7b at the ferry terminal of the Port of Algeciras.

Works started in the year 2017:

- Project for the alignment of dock N ° 1 at the port of Tarifa.
- Project for the rearrangement of the RO-RO area and the Schengen zone at the Isla Verde Quay. Phase I.
- Execution of the external renovation project of the building housing the Port of Tarifa fish market.

During the year 2017, the Port of Algeciras Bay Authority continued to carry out work and studies for planned investments in infrastructures and installations, namely:

- Studies and projects of reorganisation of the Southern Access to the Port of Algeciras.
- Studies and project of adaptation and reinforcement of the superstructure of the fixed dock of the Port of Tarifa.
- Studies and expansion project of the shore ramp of the marina at El Saladillo.
- Studies and adaptation project of the extension works of the northern quay at Campamento.
- Studies and adaptation project of the esplanade annexed to the roundabout of Isla Verde adjoining the main road and the entrance to the TTP area.
- Studies and previous dredging reports for draught improvement in Bajo Mar de Isidro in the Port of Algeciras.
- Strategic environmental study and specific environmental studies defined in the scope document of strategic environmental assessment of the Infrastructure Management Plan of the Port of Algeciras Bay.
- Analysis of the boundary conditions of layover of ships moored in the North Quay of Campamento. 1st Phase: methodological development.
- Reordering studies of the Ferry Terminal, Galera and Isla Verde Interior within the Port of Algeciras.
- Studies of draught improvement at Juan Carlos I Quay, between bollards 33 and 53, for new ‘Super-Post Panamax’ ships.

The following works have also been carried out:

- Dredging project to improve the draught at Juan Carlos I East Quay, bollards 1 to 22.
- Completion of the protection improvement works project at the “El Saladillo” dock, Port of Algeciras service area.
- Completion of the amended Project N ° 1 of the management and urbanisation of the fishing grounds of the Port of Tarifa. 2nd phase.
- Completion of the project of installation of ticket verification booths for departures to Ceuta and Tangier in the Port of Algeciras.
- Completion of the core project and execution of internal renovations to the upper floor and refurbishment of the roofs and facades of the maritime station of Tarifa.
- Completion of the refurbishment and integration project of unused port spaces in the Port of Algeciras. 2nd phase involving the interior space annexed to the oasis and the fishing pier.
- Completion of the modified core project and the execution of the new central access control facilities to the Port of Algeciras, planning of its forefront and connection with the Llano Amarillo promenade. (1st phase).
- Completion of the project of complementary works to the core project and the execution of the new central access control facilities to the Port of Algeciras, ordering of the front part and connection with the promenade of the Llano Amarillo. (1st phase).
- Project to upgrade the installations and supply of spare parts in the telescopic gangways N ° 1, 2, 3, 4, 5, 6, 7 and 7b at the ferry terminal of the Port of Algeciras.

Brief description of the most important works:

ACCESS ROAD TO THE PORT FACILITIES FROM LA LINEA DE LA CONCEPCIÓN (CÁDIZ), CA-34 (N-351), RIGHT BANK.

The CN 351 carries road traffic to and from the border of Gibraltar, the city of La Linea de la Concepcion and traffic to and from the marina at La Linea. The traffic to and from Gibraltar is intense during the peak hours of the morning, towards The Rock of Gibraltar, and in the peak hours of the afternoon, exiting The Rock of Gibraltar. During these peak hours, the queues generated hinder the access to the marina facilities. Therefore, the APBA and the Directorate General of Roads agreed to the construction of a road, a third lane for exclusive access to the port facilities, that reduced the waiting time for users of the marina. The solution adopted was an exclusive one-way lane towards the port facilities, in parallel to which is projected a bicycle lane integrated in the pedestrian zone of the bank bordering the port.

With this improvement, completed in 2017, the traffic accessing the Port is more fluid and the queues that were produced daily were reduced.

REPLACEMENT OF RAILS AND MOUNTING SYSTEM FOR TERMINAL CRANES AT JUAN CARLOS I QUAY EAST, BETWEEN BOLLARDS 20 AND 53

The initial system of support rails for the crane legs at the Juan Carlos I Quay was designed and made for cranes of up to 1200 tns. The final sections of rails and fastening system were installed in the year 2000.

The cranes that have in fact been operating on these rails have been of larger dimensions, with a weight above 1800 tns. The intense activity and the great load they bore have caused continuous breaks in the support system of the Terminal's yard cranes.

The replacement of these rails by others of greater dimension is not possible since the rolling system of the cranes is designed for type A-120 rails. Therefore, the mounting and rail support systems have been redesigned with elastomeric strips of reinforced neoprene, a 3 cm thick support metal plate and epoxy mortar for levelling and load distribution.

The replacement works had to be carried out while maintaining the terminal's operations and were done in sections of about 75 metres. These were completed in 2017.

IMPROVEMENT OF FACILITIES ON A DETACHED BREAKWATER, ISLA VERDE EXTERIOR.

The detached breakwater of Isla Verde Exterior has a length of about two thousand and twenty metres. Before being used as a dock due to its internal alignment, the facilities or services that this infrastructure requires are connections to the supply, communications and electricity networks of the Port networks by an underwater pipeline that connects it with the Eastern Quay of Isla Verde Exterior.

Due to its length, the supply network and the fire-fighting system presented losses that were difficult to locate and this required the installation of shut-off valves and counters that compartmentalised the initially installed networks.

Given the time elapsed since the completion of the breakwater, the metal elements of covers, frames, bollards and edges have been replaced or repaired. Damaged marine fenders are being repaired.

REARRANGEMENT OF THE RO-RO AREA AND THE SCHENGEN ZONE AT ISLA VERDE QUAY.

Bulk solid cement traffic has no prospect of development and this, coupled with the continued growth of goods traffic of the Strait, imposes that the old esplanades used by the cement silos are adapted for RO-RO traffic.

The rearrangement of these adjoining esplanades to the Príncipe Felipe Quay and the Isla Verde Quay involve the installation of new service networks, the laying of new pavements and construction of new enclosure walls and fence to separate the Schengen zone from the rest of the port esplanades as well as other undertakings for cargo handling companies and for improving access control to this area.

The work was started at the end of 2017 and will be completed in 2018.

ALIGNMENT ADJUSTMENT OF QUAY N ° 1 OF THE PORT OF TARIFA

Quay N ° 1 of Tarifa is made of unreinforced concrete blocks, supported by stone filling banks. Its extrados is the result of fine granular materials that escape through the joints between the blocks. This exhaust of fine particles creates holes in the flooring, holes which have to be refilled and repaired.

The replacement of the fine particles of the extrados is costly, so an operation has been proposed that reinforces the section of the quay and its foundation, through micro-piling and injections that give cohesion to these fine particles and close the gaps between the blocks.

In addition, the capping beam will be demolished and rebuilt, the flooring of the esplanade attached to the quay alignment, the system of defences and bollards reinstalled.

The work began at the end of 2017 and will conclude in 2018.

PROJECT OF MANAGEMENT AND URBANISATION OF THE FISHING GROUNDS OF THE PORT OF TARIFA, 2ND PHASE.

The site is located in the fishing grounds of the Port of Tarifa, service area of the Port of Algeciras Bay Authority and, because part of the works that have been executed were located in the port enclosure, small adjoining areas outside the land service line of the Port of Tarifa, located in Calle Alcalde Juan Núñez, were affected.

These works complete the road connection through the esplanade created after the vacation and demolition of the facilities of the old dry dock and continue the planning and urbanisation steps executed during the first phase in 2006 in the rest of the fishing grounds of the Port of Tarifa.

This road improved the communication in the interior of the port, between the commercial area where the Maritime Station is located and the fishing grounds of the Port of Tarifa.

Besides the road, the project comprises the realisation of works for the completion of the enclosure of the port facility and the sidewalk adjacent to it, in Alcalde Juan Núñez street, as well as the renovation of the entrance portico to the fishing grounds and other actions necessary for the correct operation and management of the Port of Tarifa.

PROJECT OF EXECUTION OF THE EXTERNAL RENOVATION OF THE BUILDING HOUSING THE FISH MARKET OF THE PORT OF TARIFA.

The building, built in 1944 and extended in the 1960s, is located on quay N ° 2 of the Port of Tarifa.

The works are required to repair the damages and deterioration existing in the external enclosures of the building.

It is therefore a renovation project of the external sides of the existing building, respecting both its current use and the structure and configuration of the interior, avoiding interference with the daily work and maintaining the health and safety conditions required for the use of the building.

PROJECT FOR THE REMODELLING OF THE BOARDING TUNNELS OF THE PORT OF ALGECIRAS MARITIME STATION.

The aim of the project is the remodelling of the fixed walkways connecting the Algeciras maritime station with the ferries and vice versa.

This has entailed:

The installation of new porcelain stoneware floors to replace the rubber floor that was very deteriorated by the heavy use.

The change of the sandwich panels of the deck, replacing the panels of polyurethane interior by panels with rock wool interior which offer better thermal insulation while solving the problems of water filtration.

Installation of stainless steel doors and glass with special thermal properties, which allows the closure of the boarding corridor to avoid the entry of rainwater.

Improvement and refurbishment of lighting. Installation of fans and air-blowers to improve the air conditioning in these corridors. In addition, all the corridors were painted, both the metal structure and side panels, with white polyurethane, which has improved the luminosity.

PROJECT TO RENEW THE SUPPLY NETWORK AT THE LLANO AMARILLO

This project replaced the old drinking water pipes which had many leaks, given its age, with fiber-cement pipes, and cast-iron and polyethylene pipes for smaller diameters, which is expected to considerably reduce the number of leaks.

INSTALLATION PROJECT OF A NEW AIR CONDITIONING SYSTEM ON THE GROUND FLOOR, FIRST FLOOR, CONFERENCE HALL AND COUNCIL CHAMBERS OF THE APBA HEADQUARTERS.

The objective of this project is to improve the comfort conditions of the climate controlled units fitted with old equipment, either deficient or defective, as well as to comply, in terms of ventilation, with the requirements established by the Regulation of Thermal Installations in Buildings (RITE).

PROJECT FOR THE ADAPTATION AND RENOVATION OF THE AIR CONDITIONING SYSTEMS OF THE REMODELLED MARITIME STATION BUILDING OF THE PORT OF ALGECIRAS

This project aims to ensure the operation, achieve better efficacy, efficiency and performance in the 20 year old remodelled building of the Maritime Station in the Port of Algeciras, whose air conditioning systems can no longer ensure adequate service.

6.3 PROJECTS

The drafting of projects, works specifications, supplies, as well as the technical assistance studies carried out during the year are detailed in the following list, which includes only those exceeding 150,000 euros:

- Project for alignment adjustment of quay N ° 1 of the Port of Tarifa.
- Reorganisation project of the southern access to the Port of Algeciras and marina at “El Saladillo”. Phase I: filling and reorganisation of accesses.
- Strategic environmental study and specific environmental studies defined in the scope document of strategic environmental assessment of the Infrastructure Management Plan of the Port of Algeciras Bay.
- Project of adequacy and reinforcement of the superstructure of the fixed dock of the Port of Tarifa.
- Floating dock project for the Coast Guard at the “El Saladillo” dock, Port of Algeciras.
- Project of adaptation of the extension works of the northern quay at Campamento.
- Core project and execution of urban and spatial planning of the pedestrian connection between the access control module of the new central access, the car parking building and the port terminal of Algeciras.
- Core project and implementation of a social and health care O.P.E area in the port of Algeciras.
- Implementation project of wall repairs, bunker rehabilitation and completion of the new enclosure of the Port of Tarifa.
- Project of reorganization of the surroundings of the central access to the Port of Algeciras (1st phase, 2nd intervention): Project of urban planning of the port area comprising the central access, the Plaza San Hiscio and the Paseo de la Conferencia.
- Implementation project for the remodeling and expansion of the security park into a process coordination centre and new APBA security centre in the Port of Algeciras.
- Project of complete refurbishment and audio-visual fitting of the council room at the APBA headquarters.
- Implementation project for the refurbishment and improvement of changing rooms in building N ° 7, Port of Tarifa.
- Implementation project of structural reinforcement, improvement of installations to respect current regulations and incorporation of an air exchange system in the building of the fish market at the Port of Tarifa.
- Technical specifications sheet for technical assistance in the inspection and maintenance of the water and/or electricity supply blocks in the APBA.
- Technical terms and conditions for the maintenance service included in the installation of refrigeration chambers for fish storage at the market of the Port de Algeciras.
- Technical terms and conditions for the maintenance service included in the installation of boilers, fuel tanks, pumps and distribution of clean hot water and of the heating of the APBA buildings.
- Technical specifications sheet for the technical and legal management services and maintenance of fire protection facilities of the buildings of the APBA.
- Technical specifications sheet to assist the engineering, technical/legal monitoring, consumption control and supervision of maintenance services of the facilities of the APBA.
- Technical specifications for the supply of high and low voltage electrical power to the APBA.
- Technical specifications for the cleaning services of the buildings and premises of the APBA, located inside the ports of Algeciras and Tarifa.
- Technical specifications for the collection service of solid waste floating in the public domain waters of the APBA.
- Technical specifications for the maintenance service of gardens in the port grounds of Algeciras, Tarifa, La Linea and Campamento.
- Project of improvement of the m.T. underground 15kv lines between the transformer stations Poseidon, North Dock I and North Dock II, in the Isla Verde zone of the Port of Algeciras.
- Construction project of facilities for the personnel and machinery of the road cleaning service, waste collection and management of the Port of Algeciras.
