ANNUAL REPORT

2018

FOREWORD FROM THE CHAIRMAN

The Strait of Gibraltar is, without doubt, one of the greatest current strategic locations with the most promising future in the port-maritime world. It is an unparalleled geographical area where two continents – Europe and Africa – shake hands to greet the rest of the world, ensuring that the world's logistics chains continue their course. This is where Algeciras, together with a group of ports that make up our maritime sector's engine-room, play our cards at the national and international tables.

GERARDO LANDALUCE

CHAIRMAN

Under the leadership of the Port of Algeciras – returning 107-million tonnes of throughput and 4.8-million TEUs in 2018, opposed to the 67-million tonnes and 3-million TEUs of less than a decade ago (up 59%) - the Strait is a worldwide maritime server that links up 200 ports every week both directly and without transshipment. The Strait's intercontinental sea-bridge opens up every day to usher across a significant part of the increasing traffic between the European Union and the North African seaboard, as does the motorway between the Mediterranean and the Atlantic for trade between the East and West. To accommodate all this, almost 29,000 ships – including more than 100 megaships, 6 million passengers and 1.5-million vehicles (including nearly 350,000 HGVs) – call or pass through our port every year. This is the challenge that faces the Port of Algeciras on a daily basis, and a challenge that we meet day in, day out on this strategic crossroads among our neighbours: the ports of Ceuta, Gibraltar, Tanger Med, Tangiers Ville, and our own Port of Tarifa.

It is along similar lines of good neighbourship that our advanced cooperation memorandum to implement a commercial and passenger traffic streamlining mechanism between the two shores of the Strait was signed with Tanger Med Port in February 2019, coinciding with King Felipe VI's State Visit to Morocco.

Nevertheless, ever new challenges rise over the horizons of ports that wish to be commercial goods throughput facilitators: sufficient capacity for second generation megaships, bunkers that observe new IMO (International Maritime Organisation) standards from 2020, rolling with the punches dealt by geo-economic turbulence (such as the burgeoning Sino-US trade war), all of which will affect global trade.

Finally, I would like to thank my predecessor, Mr. Manuel Moron, for his continued brilliance over two decades at the helm of our Port Authority, work which has brought significant – and, may I say, unusual – stability to the field of Spanish port-maritime public infrastructure management, and bringing with it invaluable profits for the Port of Algeciras Bay and its sphere of influence. I must also acknowledge the tenacity, experience and professionalism of all of the workers at our Port Authority, which – together with the contribution and cooperation of the companies that make up our Port Community – has helped us all reach the Spanish all-time record-breaking throughput figures that we witnessed last year and that keep us at the forefront of the European and international stages.

BOARD OF ADMINISTRATION

Manuel Morón Ledro

Chairman of the Board of Directors
Chairman of the Port Authority

Ángel Gavino Criado

Vicepresident of the Board of Directors
Andalusian Government Subdelegate in Campo of Gibraltar

José Luis Hormaechea Escós (*)

Managing Director of the Port Authority

Julio Berzosa Navazo

Algeciras Harbour Master

José Antonio Pacheco Calvo

Member Representative of the General State Administration
Deputy Delegate of the Government of Cadiz

Fernando Bertrán Girón

Member Representative of the General State Administration
State Attorney

Álvaro Rodríguez Dapena

Member Representative of the State Administration
Technical Director for Spanish Ports Department

María Eulalia Fernández-Bermejo

Member Representative of the Autonomous Community
Managing Director of the Public Ports Agency of Andalusia

Federico Fernández Ruiz-Henestrosa

Member Representative of the Autonomous Community
Regional Representative of Development and Housing in Cadiz

Jacinto Muñoz Madrid

Member representing Borough of Algeciras
First Mayor Deputy of the Algeciras Town Hall

Francisco Ruiz Giráldez

Member representing Borough of Tarifa
Mayor of Town Council of Tarifa

Carlos Fenoy Rico

Member representing Chamber of Commerce, Shipping & Industry for Campo de Gibraltar
Chairman of Chamber of Commerce, Shipping & Industry for Campo de Gibraltar

Carlos Arias de Molina

Member Representative of Economic Relevant Sectors in the Port Area
Maersk Line

Miguel Pérez de la Blanca Andeyro

Member representing Business Associations
CEPSA “Gibraltar” Refinery

Inmaculada Ortega Gil

Member representing Trade Unions
CCOO Trade Union Representative

Jorge Berenjano Borrego

Member representing Trade Unions
UGT Trade Union

Eduardo Villalba Gil (*)

Secretary of the Board of Directors

(*) Non-voting members.

2.5.2. SPECIAL LOADING AND UNLOADING FACILITIES

Location	Owner	Year Built	Characteristics
"Gibraltar" Oil Refinery Pier	Cía. Española de Petroleos, SA (CEPSA)	1966	20 hydraulically-articulated loading/unloading arms with pipelines to storage tanks; 6 manually-articulated loading/unloading arms. Installation can be used for any Re nery product. facility capacity dependent on pumping capacity of tankerships. Maximum admitted pipe pressure: 150lb/inch.
Bay of Algeciras	Cía. Española de Petróleos, SA (CEPSA)	1976	Sea island to unload crude from VLCCs, etc.
Acerinox Facilities	Acerinox	1970	250-linear-metre quay with two gantry cranes for unloading raw materials (scrap) and loading manufactured goods
Puente Mayorga dolphins	Dirección General de la Cuenca Mediterránea Andaluza	1981	2 x 12-inch water-loading points. Flow: 5760 Tm/h.
Endesa-Puertos facility	Endesa Generación, SL	1984	1 x 1,500 Tm/h (max) continuous loading gantry crane. 1 line of 4,500 Tm/h (max) conveyor belts for unloading. 1line of 1,500 Tm/h (max) conveyor belts for loading.
Endesa-Puertos facility	Holcim España, SA	2009	2 loose cement unloading points and pipeline to storage silos. Unloading capacity: 200 Tm/h.
Ingeniero Castor R. del Valle breakwater	Compañía Logística de Hidrocarburos CLH, SA	2012	3 refuelling/defuelling pipes, each with a 750 MT/h capacity.
Ingeniero Castor R. del Valle breakwater	Compañía Logística de Hidrocarburos CLH, SA	2012	3 10-inch refuelling/defuelling folding arms connecting with 4 pipes for IFO and Gasoil. 8kg/csqm maximum working pressure and a 3,000 MT/h ow.
Explanada Isla Verde Exterior	Vopak Terminal Algeciras, SA	2013	Hub Distribution. Petrol product storing facilities: 22 tanks ranging from 2,000 to 40,000 cubic metres. Dock (25 metres in draught) providing access to vessels and barges.

2.8 BRIEF OVERVIEW OF SPECIFIC TRAFFIC FACILITIES

PASSENGERS

PORT OF ALGECIRAS

FERRY BERTHS:

At Algeciras, we have eight ferry berths that serve the Strait of Gibraltar lines (Algeciras-Ceuta-Algeciras and Algeciras-Tanger Med-Algeciras). Passenger distribution is taken care of by elevated platforms and walkways that connect the berths to our passenger terminal. We also have specific areas provided with all the necessary services that may be required by passengers who travel on ferries with their vehicles.

PASSENGER TERMINAL:

The main passenger terminal building occupies a 12,000m2 surface area. The ground floor is provided with disembarkment lounges, around which you can find shops and an assortment of ticket, shipping line, and administrative offices. The top floor is where the embarkment lounges, cafeterias, and passport and luggage control points are located.

Our passenger terminal has an annex building that is used as a shopping and service centre that occupies a 7,900m2 surface area on two storeys. The ground floor is where travel agencies and shipping lines have their offices, and the top floor is given over to offices for forwarding agents and shipping lines. On the west wing of the building is where our Helicopter Terminal, managed by AENA, is located.

MULTI-STOREY CAR-PARK:

Our multi-storey car-park is normally used by passengers who travel to Ceuta and Tangiers, but who prefer to leave their cars behind in Algeciras. The car-park has a capacity for 810 vehicles on three 180m x 38m levels. The ground floor is open-plan and is also used to organise cars embarking on ferries. The fourth level of the car-park is where our helipad is located.

PORT OF TARIFA

BERTHS:

We have two berths that are currently used by high-speed sea-cats that serve the Tarifa-Tangiers City-Tarifa line.

PASSENGER TERMINAL:

Our passenger terminal at Tarifa occupies a 2,116m2 surface area on two storeys. The ground floor is where ticket sales and other administrative offices are located, together with the shipping lines' check-in points and a cafeteria. The top floor is another area dedicated to official administrative offices.

RO-RO TRAFFIC

We have seven other ro-ro berths (apart from the above-mentioned eight passenger berths that have 10.5m-plus draughts) located on the following quays: one on Isla Verde Quay, with a 10.0m draught; one on Ingeniero Castor R. Del Valle Breakwater, with a 14.5m draught; one on Principe Felipe Quay, with a 14.5m draught; two on Juan Carlos I Quay (one on the North side and another on the South side, with 9.0m and 10.5m draughts respectively); and two more on Isla Verde Exterior Quay (one on Isla Verde's North Quay, with a 17.0m draught and another on the Detached Breakwater Quay, with an 18.5m draught).

All these berths serve ro-ro ferries that cover the Algeciras-Ceuta and Algeciras-Tanger Med lines, as well as occasionally being used for temporary lines, such as the one currently covering the route from Algeciras to ports in Mauritania.

CONTAINERS

APM TERMINAL:

This terminal occupies a 67.1Ha surface area on Juan Carlos I Quay and is fitted out with 1,941 linear metres of berthline, with draughts ranging from 16.0m to 18.0m. There are currently nineteen STS cranes (8 x 74.0mT, 8 x 70.0mT, and 3 x 65.0mT) and sixty-five RTG cranes in service at the terminal.

TOTAL TERMINAL INTERNATIONAL
ALGECIRAS (TTI-A) TERMINAL

This terminal occupies a 35.76Ha surface area on Isla Verde Exterior Quay and is fitted out with 650 linear metres of berthline, with an 18.5m draught. There are currently eight 65.0mT STS cranes and thirty-two 40mT RTG cranes in service at the terminal.

OIL

SEA ISLAND:

Our sea island facility is located at a depth of 60m, and is able to accommodate oil tankers of up to 350,000 tonnes DW. It has a 12,000m3/hour storage capacity and is also able to deliver a refuelling service.

CEPSA'S "GIBRALTAR" REFINERY PIER

CEPSA's refinery in San Roque has an annual 12-million-tonne crude distilling capacity. The port inside CEPSA's facility has seven berths to load and unload product on a 1,467-metre-long pier, plus another terminal exclusively used for barge operations. Here, ships of up to 175,000 tonnes DW can be accommodated, as the facility is provided with draughts that range from 6.0m to 20.0m

COAL

ENDESA GENERATION:

Endesa's terminal has more than 700 metres of quayline and excellent dry bulk unloading and handling facilities. The 360-metre-long unloading quay can handle ships of up to 270,000 tonnes DW with its 23m draught, the loading quay allows ships of up to 25,000 tonnes DW to berth, and a third quayline can accommodate ships of up to 60,000 tonnes DW.

STAINLESS STEEL

ACERINOX:

The Acerinox factory has its own port facility for handling imported raw materials and for shipping finished product. The plant has an annual steel plant capacity of 1,100,000 tonnes, a 900,000-tonne hot rolling plant capacity and a 670,000-tonne cold rolling plant capacity. The factory occupies a 125Ha surface area and its port terminal has two gantry cranes serving a 250-metre quayline with a 9.5-metre draught.

WATER

MEDITERRANEAN BASIN OF ANDALUSIA WATER AUTHORITY DOLPHINS IN PUENTE MAYORGA (SAN ROQUE)

This facility is a water-loading system for tankers of up to 115,000 tonnes DW, made up of berthing and mooring dolphins.

WATER SPORTS

Our El Saladillo Marina facility in Algeciras offers more than 900 berths for sports and recreational boats of up to 15m length spread over a 35Ha surface area. Various local sailing clubs have installed their headquarters here and manage the berths on a concessionary basis.

This facility is complemented by the Puerto Chico Marina in La Linea de la Concepcion to the North-West of the Bay, where local sailing clubs manage 438 berths on the one hand and the Alcaidesa Marina Company manages 624 berths on the other. Sports and recreational boats of up to 50m length are able to berth here and can be provided with all the expected supply, repair and dry storage services.

At the same time, APBA manages the Port of Tarifa's 118 berths for sports and recreational boats of between 5m and 11m length.

FISHING

PORT OF ALGECIRAS

FISH MARKET:

The Algeciras Fish Market occupies an 8,770m² surface area distributed into auction and circulation areas, together with premises for ship owners and exporters, among others.

PORT OF TARIFA

FISH MARKET:

The Tarifa Fish Market occupies a 1,093m² surface area distributed exactly in the same way as the one in Algeciras.

TOTAL	53.303.674,02	42.438.283,22	9.935.861,87	

6.2 A BRIEF DESCRIPTION OF THE MOST IMPORTANT WORKS

The following intervention works were completed in 2018, having commenced in or prior to 2017:

- Amended project to renew the supply network on Juan Carlos I Quay at the Port of Algeciras.
- Amended Project to execute the works on the Project to automate the Port of Algeciras Bay Authority administrative building's lighting system.
- Amended project to adapt the fire-fighting protection measures at Port of Algeciras Passenger Terminal and embarkment tunnels.
- Supplementary Project to adapt the protective measures against fire at Port of Algeciras Passenger Terminal and embarkment tunnels.
- Installation Project to provide a new climate control system on the ground floor, first floor, auditorium and board room at APBA's headquarters.
- Improvement Project to the underground medium-voltage 15kV power lines between Poseidon, North Quay I and North Quay II transformer stations in the Isla Verde area of the Port of Algeciras.
- Project to adapt and renew the climate control systems in the refurbished Passenger Terminal building at the Port of Algeciras.
- Project to adapt the fire-fighting equipment at Port of Tarifa Passenger Terminal.
- Amended Execution Project to refurbish the outside of Port of Tarifa's fish-market building.

- Adaptation Project for Quay Nº 1 alignment at the Port of Tarifa.

- First Phase Rearrangement Project for the ro-ro cargo and Schengen areas on Isla Verde Quay.

Of all the works commenced in 2018, the following were completed within the year:

- Improvement Project to the underground medium-voltage 15kV power lines between Poseidon, North Quay I and North Quay II transformer stations in the Isla Verde area of the Port of Algeciras.
- Repair Execution Project to the facing, refurbishment of the bunker and completion of the new Port of Tarifa sea wall enclosure.
- Adaptation Project for the esplanade next to the Isla Verde roundabout bordering the main thoroughfare and the entrance to TTP's handling area.
- Project to expand the slipway at El Saladillo Marina.

Works commenced in 2018:

- Improvement Project to the underground medium-voltage 15kV power lines between Poseidon, North Quay I and North Quay II transformer stations in the Isla Verde area of the Port of Algeciras.
- Installation Project to enclose the perimeter of, and control access to, the plot where the Port Police and Conservation Department buildings are located at the Port of Algeciras.

- Basic Execution Project to rearrange the urban and spatial area of the pedestrian connection between the new Central Gate check-point module, the level car-park and the passenger terminal at the Port of Algeciras.

- Second Phase Rearrangement Project to the Central Gate at the Port of Algeciras: Urban Rearrangement Project of the area between the Central Gate, Plaza San Hisico and Paseo de la Conferencia.

- Alteration Execution Project to adapt the changing rooms in Building Nº 7 at the Port of Tarifa.

- Basic Execution Project for a new Cross-the-Straits first aid post and the rearrangement of the outer spaces at the Port of Algeciras.

- Complete alteration and audio-visual refurbishment of APBA's Board Room at APBA headquarters.

- Project to adapt and reinforce the fixed recreational pier superstructure at the Port of Tarifa.

- Project to adapt Campamento North Quay extension works.

In 2018, the Port of Algeciras Bay Authority continued to perform works and studies to plan for investment on infrastructure and facilities, notably:

- Strategic environmental study and corresponding specific environmental studies detailed in the Port of Algeciras Bay Infrastructure Master Plan's strategic environmental assessment scope document.

- Studies and reports prior to the Phase 1 Project to rearrange Port of Algeciras' South Gate and "El Saladillo" Marina: landfill and thoroughfare rearrangement.

- Drafting of the Project to expand the ro-ro berth on Isla Verde Interior Quay.

- Studies and projects to rearrange the ro-ro area of Principe Felipe Quay and the pilots' building.

- Studies and the Phase 2 Project to improve draughts on East Juan Carlos I Quay from bollards 33 and 53.

- Studies and the Phase 2 Project to rearrange Port of Algeciras' South Gate and "El Saladillo" Marina: new access checkpoints and road-surface reinforcement.

- Studies and Project to rearrange and reinforce the access road surfaces to the container terminals on Juan Carlos I Quay and the East Quay of Isla Verde Exterior at the Port of Algeciras.

- Studies and the Project for a gateway to the Exterior Quay at Campamento facility.

- Studies and the Project for an outer embankment on the Port of Tarifa sea wall.

- Studies and the Project to rearrange the esplanades next to the BIP gateway, the Fishing Dock and the Port of Algeciras Fish Market buildings.

The following works settlements were also made:

- Project to build a new roof on the remodelled Passenger Terminal building at the Port of Algeciras.
- Project to adapt mobile walkways N° 1, 2, 3, 4, 5, 6, 7 and 7b installations and their supply of spares at Port of Algeciras Ferry Terminal.
- Amended Project to renew the supply network on Juan Carlos I Quay at the Port of Algeciras.
- Project to refurbish public access to ticket sales offices located in the shopping area of the remodelled Passenger Terminal building in Algeciras.
- Project to adapt the fire-fighting equipment at Port of Tarifa Passenger Terminal.
- Amended project to renew the supply network on Llano Amarillo Esplanade at the Port of Algeciras.
- Project to refurbish the concrete surfacing next to the Auxiliary Boat Quay edge at the Port of Algeciras.
- Amended Execution Project to refurbish the outside of Port of Tarifa's fish-market building.
- Supplementary Works Project to the Execution of the outer refurbishment of Port of Tarifa's fish-market building.

- Outside Urban Development & Refurbishment Project of the slipway next to the Civil Guard headquarters at the Port of Algeciras.

- Project to replace the track and its fastening system between Bollards 20 and 53 on Juan Carlos I (East) Quay.

- Project to provide a slip road to the APBA facilities in La Linea de la Concepcion (Cadiz) on the right-hand side of the CA-34 (N-351) road from km 6.215 to 6.930.

- Installation Project for Isla Verde Exterior detached breakwater.

- Supplementary Works Project to the Installation Project for Isla Verde Exterior detached breakwater.

- Installation Improvement Project on Isla Verde Exterior detached breakwater.

Brief description of the most important works:

PHASE 1 PROJECT TO REARRANGE PORT OF ALGECIRAS' SOUTH GATE AND "EL SALADILLO" MARINA: LANDFILL AND THOROUGHFARE REARRANGEMENT

This intervention comprises the Phase 1 Project to rearrange Port of Algeciras' south gate. The required levelled areas will be established in order to define the ring-road that will circumnavigate the recreational facility of El Saladillo Marina. When completed, access will still be via the currently existing roundabout, but this is to be remodelled

for future road access. The First Phase of works responds to the needs of the Port of Algeciras South Gate project from the N-340 road, a project that is currently being processed by the Spanish Highways Department.

The creation of the levelled esplanade requires the El Saladillo River to be channelled underground, along the same double-framed structural lines that the river has a little further upstream.

Other significant works that have been considered include the reinforcement and improvement of the existing terrain, adaptation of the service networks and the creation of another roundabout inside El Saladillo Marina to distribute its internal thoroughfares.

PHASE 2 PROJECT TO IMPROVE DRAUGHTS ON EAST JUAN CARLOS I QUAY FROM BOLLARDS 33 AND 53

Juan Carlos I Quay – formerly known as El Navio Quay – is the berthing infrastructure for ships arriving at our container terminal with the same name. The quay was projected and built during the last century, between 1985 and 1998. The evolution of the ships and cranes that handle containers has required us to adapt its berthing infrastructure to greater draughts and crane loads. During the first two interventions, draughts at this berth line were taken down to the physical level of 17.50m. To be able to take advantage of their load capacity, the Triple E Class containerhips need draughts to be deeper, thus obliging us to improve draughts even further. This new draught improvement was performed on

the northern side of the quay, along 500 metres of its berth line.

The works consisted basically of reinforcing the quay foundation by means of micro piles and repeated injections, and of dredging out the draught improvement in the approach area to the berths and in the berthing zone parallel to the quay edge itself.

PROJECT TO EXPAND THE RO-RO BERTH ON ISLA VERDE INTERIOR QUAY

Where the Isla Verde Interior and Principe Felipe Quays' alignments meet, there is a ro-ro berth that is used by cargo ships that ply the Straits.

Due to the ever-increasing throughput witnessed by this type of traffic, there is justification for increasing both the width of its ramps and the distance between the same to allow two cargo ships to use the ramp at the same time: one loading, the other unloading. For this to happen, we needed to increase the existing ro-ro surface areas that – due to the geotechnical conditions and current structures to be increased – we were able to resolve via piles, girders and reinforced concrete slabs.

PROJECT FOR A GATEWAY TO THE EXTERIOR QUAY AT CAMPAMENTO FACILITY

Campamento's Exterior Quay does not have enough of a well-paved surface area for it to be able to accommodate cargo loading and unloading operations, or to be able to handle repairs afloat. Given the occupation of the present-day Interior

Quay, we decided it was convenient to refurbish the Exterior Quay to provide these kinds of services.

In order to improve the operational state of the quay, we proposed to fit out the esplanades next to the Exterior Quay with a rigid surface of concrete and fibre, and specify an access road from the Campamento Gate to the quay made of asphaltic-concrete surfacing.

PROJECT TO REMODEL THE PASSENGER TERMINAL EMBARKMENT TUNNELS AT THE PORT OF ALGECIRAS

The aim of the above project was to redesign the fixed walkways that connect our Passenger Terminal with the ferries at the Port of Algeciras.

This has fundamentally meant the following:

- Execution of new porcelain stoneware flooring to substitute the old studded-rubber flooring that had deteriorated due to intensive wear and tear.
- Changing the sandwich-panel roofing, by replacing the interior polyurethane panels for ones made of rock wool – a better thermal insulator – that solved the water leaking in from outside.
- Installation of stainless steel doors and windows with special thermic properties that has allowed us to close up the embarkment corridors and avoid rainwater coming in.
- Improvement and refurbishment of the lighting.

- Installation of fans and air jets to improve the climate within the corridors.

- Painting of both the metallic structure and the lateral panels in the corridors in white polyurethane, which has improved their luminosity.

PROJECT TO RENEW THE SUPPLY NETWORK ON JUAN CARLOS I QUAY AT THE PORT OF ALGECIRAS

This project has seen the old drinking water pipelines, which caused a lot of leaks because of its age, replaced by new fibre-cement piping. Cast-iron pipes were installed, with polyethylene piping used for smaller diameters, which should reduce the number of leaks quite considerably.

PROJECT TO AUTOMATE THE PORT OF ALGECIRAS BAY AUTHORITY ADMINISTRATIVE BUILDING'S LIGHTING SYSTEM

The aim of this project was to implement automated climate and lighting control programmes in APBA's administration building to help optimise its consumption of electricity, in the realm of environmental sustainability.

PROJECT TO PROVIDE A NEW CLIMATE CONTROL SYSTEM ON THE GROUND FLOOR, FIRST FLOOR, AUDITORIUM

AND BOARD ROOM AT APBA'S HEADQUARTERS

This project aimed to improve the comfort of workers in the climate-controlled offices that had old, deficient or faulty equipment, as well as to comply with Building Thermal Installations Regulations ventilation rules.

PROJECT TO ADAPT AND RENEW THE CLIMATE CONTROL SYSTEMS IN THE REFURBISHED PASSENGER TERMINAL BUILDING AT THE PORT OF ALGECIRAS

The above project's aim was to guarantee the working order – and achieve a higher efficiency, effectiveness and performance – of the climate-control systems in the refurbished Passenger terminal at the Port of Algeciras. These systems were more than 20 years old and incapable of guaranteeing good performance.

BASIC EXECUTION PROJECT TO REARRANGE THE URBAN AND SPATIAL AREA OF THE PEDESTRIAN CONNECTION BETWEEN THE NEW CENTRAL GATE CHECK-POINT MODULE, THE LEVEL CAR-PARK AND THE PASSENGER TERMINAL AT THE PORT OF ALGECIRAS

The above project intended to give continuity to the integration of the port's interface with its city: to rearrange the urban development and visual aspect of the space that connects our new Central Gate check-point module with the Passenger Terminal at the port of Algeciras.

Rearranging this area meant the creation of a 10-metre wide pavement around all the area of the multi-storey car-park, using flooring of the same geometry and quality as the one used in the original Central Gate surrounding area project, ensuring its aesthetic continuity to the passenger Terminal.

At the same time, we wanted to make use of the existing landscaped island (next to the car-park) by creating three public rest areas between the green areas, so urban furniture was placed here including four pergolas that would give shade to a row of benches.

The slip roads to the Ceuta embarkment area were resurfaced, both outside the three-lane car-park that organises vehicles to Ceuta and underneath the same, by milling the existing road surface and giving it a new layer of asphalt.

The existing public toilets under the Ceuta embarkment area were replaced with two 2300 x 2200 x 2450mm-sized prefabricated, automatic, unisex toilets manufactured by PRIMUR.

Additionally, a second skin – made out of 2mm chrome-coloured, expanded, pre-galvanized steel – is going to be given to the sides of the multi-storey car-park building to improve the northern and north-eastern façades, which should provide it with a much more uniform and vital appearance.

We have chosen a 1.20-metre-wide module for

the design of its new skin; this should enable it to be visually uniform, without other components distorting the consistent image that we have tried to provide. We have also been able to make the series of doors leading to the machine rooms and electrical installations modular, thus giving them a controllable weight.

The skin will leave a maximum clearance of 10cm along its bottom edge to allow access to drains that are found along its perimeter. The minimal 10cm clearance will also prevent children being able to climb under it. The top edge has been undertaken behind the current leading edge of the prefabricated concrete panels of the first floor structure.

Lastly, the existing installations are to be repaired: new rainwater, electrical and communications fixtures are to be executed throughout the project.

**SECOND PHASE REARRANGEMENT
PROJECT TO THE CENTRAL GATE AT
THE PORT OF ALGECIRAS: URBAN
REARRANGEMENT PROJECT OF THE
AREA BETWEEN THE CENTRAL GATE,
PLAZA SAN HISICO AND PASEO DE LA
CONFERENCIA**

The work-site is located in a very special place next to the check-point to access the Port of Algeciras, called "Paco de Lucia Central Gate".

This project goes along the same lines as the integration of our port's façade that began during prior phase work that has already been executed: it resolves the spatial rearrangement of the

abovementioned area and completes the port's enclosure around the Rio de la Miel river mouth.

Moreover, the project is set to improve the city's rainwater drainage system from Avenida Virgen del Carmen; problematic due to many stretches that do not function and prevent the natural flow of water, and the dismal state of maintenance that has caused existing sewers to be almost completely blocked as a whole.

The integration that we have proposed is mainly based on the pedestrians that make their footfall to and from the Port of Algeciras Passenger Terminal, and the city's railway and bus stations.

This suggested spatial rearrangement should create a new pedestrian area that is more generous than the current one, with public rest areas surrounded by landscaped areas, benches underneath pergolas, and litter bins. We are also going to give continuity to the existing cycle path and connect it to the one previously executed by the Andalusian Government.

**BASIC EXECUTION PROJECT FOR A
NEW CROSS-THE-STRAIT FIRST AID
POST AND THE REARRANGEMENT OF
THE OUTER SPACES AT THE PORT OF
ALGECIRAS**

This project deals with the construction of a new building to provide a service and support to passengers during Operation Cross-the-Strait. It is to house the offices for the team who organise said Operation, as well as Civil Defence, the Andalusian

Health Service (SAS), Red Cross, the Mohamed VI Foundation and the Moroccan Consulate.

- Civil Defence Zone (PC): Made up of a lobby and waiting room, conference room, three offices, store, hall and changing rooms for men and women.

- Andalusian Health Service Zone (SAS): Made up of a lobby and waiting rooms, two surgeries, observation room and infirmary, store, public and private men's and women's toilets, handicapped toilet, bedroom, hall and health workers' waiting room. It also has an ambulance zone, allowing Red Cross staff to cross from an adjacent hall.

- Red Cross Zone (PC): Made up of a lobby and waiting room, coordination & control room, manager's office, crèche, handicapped toilet, private men's and women's toilets, bedroom, lounge and office, hall and store. It also has a CPD station with independent access from outside.

- Moroccan Consular Zone (C): Made up of a lobby and waiting room, lounge, office, store, hall, bedroom and toilet.

- Mohamed VI Foundation Zone (F): Made up of a lobby and waiting room, store, hall, bedroom and toilet.

Outside, there is an array of urban furniture with prefabricated concrete benches, duly marked car-parking spaces and a signpost.

6.3 PROJECTS

Project drafts, works specification guidelines, supplies and technical assistance studies undertaken in 2018 are detailed in the following breakdown below, but only include those valued at €150,000 or more:

- Second project to improve draughts on East Juan Carlos I Quay from bollards 33 to 53.
- Project to expand the ro-ro berth on Isla Verde Interior Quay.
- Project for a gateway to the Exterior Quay at Campamento facility.
- Project to rearrange and reinforce the access road surfaces to the container terminals on Juan Carlos I Quay and the East Quay of Isla Verde Exterior at the Port of Algeciras.
- Project to rearrange the esplanades next to the BIP gateway, the Fishing Dock and the Port of Algeciras Fish Market buildings.
- Project for an outer embankment on the Port of Tarifa sea wall.
- Supply and installation of bus shelters for the bus stops at the Port of Algeciras Passenger Terminal.
- Basic and execution project for a new Cross-the-Straits first aid post and the rearrangement of the outer spaces at the Port of Algeciras.
- Execution project to refurbish the interior and renew installations in the administrative area of APBA's conservation building.

- Basic and execution project to refurbish and adapt the former accommodation buildings next to Tarifa Lighthouse.
- Basic and execution project for a new lighthouse at Punta Paloma, Tarifa.
- Project to completely modify N° 1 & 2 public toilets on the eastern corridor of the ground floor of the Port of Algeciras Passenger Terminal.
- Basic and execution project to modify the public toilets and office next to the Tangiers embarkment lounge for the use of the Port of Tarifa Passenger Terminal cleaning service.
- Amended project for the complete alteration and audio-visual refurbishment of APBA's Board Room at APBA headquarters
- Project for a temporary waste storage point at the Port of Algeciras
- Project to refurbish the south-west corner of the Port of Algeciras Fishing Dock.
- Project to refurbish the cooling system at the Port of Algeciras Fish Market.
- Project for an underground medium-voltage network, A.I.C.-type 400kVA transformer substation, low-voltage underground network, transfer of a subscriber-type 630kVA transformer substation (File N° AT-4130/97) and reconnection of B.T. circuits on Juan Carlos I Quay at the Port of Algeciras.

- Project to repair the dolphin shield fenders located at Berths N° 1, 2, 3 and 4 on La Galera Quay at the Port of Algeciras.
- Project to install a roof and repair structural elements of the Juan Carlos I Quay warehouse building at the Port of Algeciras.
- Technical specification guidelines for the detection systems maintenance service to comply with the I.S.P.S. Code at APBA.
- Technical specification guidelines for the prefabricated module hiring service to render a range of services at APBA.
- Technical specification guidelines for the road-cleaning service, waste collection and management.
- Technical specification guidelines for the complete maintenance service of the compressed air installation, machinery and tools in APBA's conservation building workshops.
- Technical specification guidelines to improve and update the mobile walkways, and the stock of available hydraulic cylinders and electronic spares.
- Technical specification guidelines to remove high-volume waste left at the ports managed by APBA.
- Technical specification guidelines to supply two rented Christmas trees and fit and maintain the Christmas illuminations at the port facilities managed by APBA.

- Technical specification guidelines to hire a disinfection and vermin-control service in the port areas managed by APBA.
- Technical specification guidelines for a public tender to award a maintenance service for APBA's lightning conductors.
