ANNUAL REPORT 2019

FOREWORD FROM THE CHAIRMAN

As we present our account of 2019 and reflect on the times we are all living through, I cannot help feeling that it all seems a bit like science-fiction. Though Covid-19 is not the only virus mankind has faced recently – witness SARS, Bird Flu or Ebola among others – the pandemic caused by this one has brought the world to a complete standstill with grave health, economic and employment concerns that put our port's magnificent achievements into the shade.

Even so, we may content ourselves with our record-breaking results, such as our 109-million-tonne throughput figures, our 5.1-million-TEU return, the 6 million passengers or the near-30,000 ship calls at our port. The track record of the Port of Algeciras Bay and its contribution to the economic and social development of our outlying region and province was acknowledged publicly by the CEC (Cadiz Business Federation) at a business event held in Rota Naval Base and chaired by HM King Felipe VI last June.

These huge throughput figures were achieved despite work-force shortfalls suffered by our own Port Authority staff, other agencies such as our BIP (Border Inspection Point), and restrictions placed on infrastructure, especially on our rail link and on several of our roads – both to the North and South – that connect the Ports of Algeciras and Tarifa.

Throughout 2019, we took on an intense series of activities abroad. We made more than twenty trade missions to fifteen countries on four continents. A special mention should be given to the different events we held in Latin America – one of our dearest benchmark markets.

GERARDO LANDALUCE CALLEJA
CHAIRMAN

The consolidation of our relations with Costa Rica stands out, especially since the signing of a cooperation agreement between ourselves and the country's foreign trade marketing agency – PROCOMER – during the trade mission we set up there together with our Port Community. At the same time, we have also built on the numerous trade contacts we had previously made in China, where we worked hand-in-hand with the Port of Ningbo at the International Maritime Forum on Port Cooperation for the New Silk Road.

Our special relationship with Morocco rose to new heights with the signing of an Advanced Cooperation Memorandum between the Port of Algeciras Bay and the Port of Tanger-Med Authorities during the State Visit made by the King and Queen of Spain to Morocco in February.

As a result of the C-19 pandemic worldwide, everyone is looking towards more flexible, reliable supply chains that lend weight to transshipment. It is in this new backdrop that great logistics and port-maritime hubs like Algeciras will come to the fore, both because of our critical infrastructure for the State and because we guarantee the transit of cargoes on a European and intercontinental level. Proof of the fact that these mega-hubs provide added strategic value to global distribution can be seen in the high level of activity that they have kept up during the pandemic.

In such troubled times, this is why we should be compelled to prioritise and push for more profitable investment that ensures a productive return. The relevant European and Spanish authorities should take good note of this to draw up future EU transport policies that create safe transport corridors and, consequently, of the need for strategic prioritisation when they define and execute the TEN-T (Trans-European Transport Network) project.

We are very aware of the challenges and difficulties that we face in the near future; however, we will not falter in our resolve to keep on working enthusiastically and committedly to get the best results possible. Safety, competitiveness and sustainable development are the main lines of work we have set out to achieve this. A number one port must be sustainable and create added value. Apart from advancing in maritime business, we should also be looking at our hinterland area – not only to encourage infrastructure growth, but also to promote port-regional relations – as a sign of our commitment to all the boroughs on the Bay and Tarifa. Against this backdrop, we continue to be fully committed to such special projects as the Maritime Lagoon. This is an initiative that we are currently going forward with as part of our port-city development scheme and through the agreement reached among the authorities involved (Algeciras City Council and the Andalusian Government).

On top of all the above, we have our sights firmly set on strengthening our port's position as the South of Europe's top technological logistics hub, so we are also promoting the ideas of innovation and digitalisation.

I would like to conclude this message by once again offering my THANKS to all my colleagues at the Port of Algeciras Bay Authority for their dedication and efforts to continue to exceed and excel. I also thank them for their support and cooperation in my first year as Chairman of APBA.

I wish to make my thanks extensive to all the workers – working, retired or absent – and the companies who make up our Port Community for the incredible work that they do, and to all our customers who give their trust the Port of Algeciras Bay.

BOARD OF ADMINISTRATION

ALGECIRAS BAY PORT AUTHORITY

- Gerardo Landaluce Calleja
Chairman of the Board of Directors.
Chairman of the Port Authority.
- Antonio Sanz Cabello
Vicepresident of the Board of Directors.
Member of the board representing the Autonomous Community.
- José Luis Hormaechea Escós (*)
General Manager of the Port Authority.
- Julio Berzosa Navazo
Member of the board representing the Public Administration.
- José Antonio Pacheco Calvo
Member of the board representing the Public Administration.
- Fernando Bertrán Girón
Member of the board representing the Public Administration.
- Álvaro Rodríguez Dapena
Member of the board representing the Public Administration.
- Rafael Merino López
Member of the board representing the Autonomous Community.
- Mercedes Colombo Roquette
Member of the board representing the Autonomous Community.

2.5.2. SPECIAL LOADING AND UNLOADING FACILITIES

LOCATION	OWNER	YEAR BUILT	CHARACTERISTICS
“Gibraltar” Oil Refinery Pier	Cía. Española de Petroleos, SA (CEPSA)	1966	20 hydraulically-articulated loading/unloading arms with pipelines to storage tanks; 6 manually-articulated loading/unloading arms. Installation can be used for any refinery product facility. Capacity dependent on pumping capacity of tankerships. Maximum admitted pipe pressure: 150lb/inch.
Bay of Algeciras	Cía. Española de Petróleos, SA (CEPSA)	1976	Sea island to unload crude from VLCCs.
Acerinox Facilities	Acerinox	1970	250-linear-metre quay with two gantry cranes for unloading raw materials (scrap) and loading manufactured goods.
Puente Mayorga dolphins	Dirección General de la Cuenca Mediterránea Andaluza	1981	2 x 12-inch water-loading points. Flow: 5760 Tm/h.
Endesa-Puertos facility	Endesa Generación, SL	1984	1 x 1,500 Tm/h (max) continuous loading gantry crane. 1 line of 4,500 Tm/h (max) conveyor belts for unloading. 1line of 1,500 Tm/h (max) conveyor belts for loading.
Endesa-Puertos facility	Holcim España, SA	2009	2 loose cement unloading points and pipeline to storage silos. Unloading capacity: 200 Tm/h.
Ingeniero Castor R. del Valle breakwater	Compañía Logística de Hidrocarburos CLH, SA	2012	3 refuelling/defuelling pipes, each with a 750 MT/h capacity.
Ingeniero Castor R. del Valle breakwater	Compañía Logística de Hidrocarburos CLH, SA	2012	3 10-inch refuelling/defuelling folding arms connecting with 4 pipes for IFO and Gasoil. 8kg/csqm maximum working pressure and a 3,000 MT/h ow.
Explanada Isla Verde Exterior	Vopak Terminal Algeciras, SA	2013	Hub Distribution. Petrol product storing facilities: 22 tanks ranging from 2,000 to 40,000 cubic metres. Dock (25 metres in draught) providing access to vessels and barges.

2.8 BRIEF OVERVIEW OF SPECIFIC TRAFFIC FACILITIES

PASSENGERS

PORT OF ALGECIRAS

- **BERTHING FOR FERRIES:**

There are eight berths for ferries serving the lines of the Strait Algeciras-Ceuta-Algeciras and the Algeciras-Tangier Med-Algeciras. The movement of passengers is through platforms and elevated quaysides that link the berths with the maritime station. For passengers who board with their vehicles, there are also spaces and specific areas equipped with the required services.

- **MARITIME STATION:**

The main building of the passenger terminal has a total area of 12,000 m². The ground floor is dedicated to ticket sales, shipping offices, commercial premises, and official agency offices, as well as arrivals lounges. The upper floor is intended for a cafeteria, luggage, passport, and departure lounge control.

There is an annexed building, intended for business areas and amenities, which has a total area of 7,900m² distributed over two floors. The ground floor houses travel agency and shipping company offices. The upper floor is occupied by freight forwarders and shipping company office. The Heliport Terminal, managed by AENA, is located in the building's west wing.

- **VEHICLE PARKING:**

The Port of Algeciras provides a long-stay parking facility, with a maximum capacity of 810 vehicles, distributed over 3 floors each measuring 38x180

metres for passengers who are travelling to Ceuta or Tangier and wish to leave their vehicle in Algeciras. The ground floor is kept clear and used to organise vehicles when boarding. The helipad is located on the fourth floor of the building.

Express parking is located in front of the passenger terminal.

PORT OF TARIFA

- **BERTHS:**

There are two berths currently used by high- speed vessels that cover the Tarifa-Tangier City-Tarifa line.

- **MARITIME STATION:**

The maritime station has a total area of 2,116m² distributed over two floors. Ticket sales desks, shipping company check-in, the cafeteria and official bodies are located on the ground floor. Official bodies offices are also located on the upper floor.

- **VEHICLE PARKING:**

The Port of Tarifa has a car park with direct access to Tarifa's maritime station.

RO-RO TRAFFIC

There are 7 Ro-Ro berths, in addition to the 8 mentioned in the passengers section, with a draught of 10.5m and located at the following quays: one in Isla Verde with a draught of 10m, one in Ingeniero Castor R breakwater. del Valle with a draught of 14.5m, one in Principe Felipe with a draught of 14.5m, two in the Juan Carlos I Quay (one in the north and the other in the south with 9 and 10.5m of

draught, respectively) and two other ro-ro berths in the Isla Verde Exterior Quay (one in the North Quay with 17.5m of draught and another attached to the seawall quay with 18.5m of draught).

These berths serves Ro-Ro ships that cover the Algeciras-Ceuta and Algeciras- Tangier Med lines as well as other occasional lines, such as the one currently connecting to the Ports of Mauritania.

On the other hand, the Heavy Traffic Terminal (HTT) located in the Isla Verde Quays, consists of a closed and controlled space for the concentration of heavy traffic (semi-trailers and full load units) which operate within the Port of Algeciras, improving the optimisation of the import/export logistic chain and offering added value elements to both the operator as well as the shipper.

CONTAINERS

- **APM TERMINALS ALGECIRAS:**

This terminal, located on the Juan Carlos I Quay, occupies an area of 67.1 hectares. It has 1,941 linear metres of berthing with 16 to 18m of draught. 19 portainer cranes (8 x 74tm, 8 x 70tm, 3 x 65tm), 65 transtainers and 102 tractor trucks.

- **TOTAL TERMINAL INTERNATIONAL ALGECIRAS (TTI-A):**

This terminal, located on the Isla Verde Exterior Quay, occupies an area of 35.76 hectares. It has 650m of berthing with 18.5m of draught. Eight 65 tm portainer cranes, thirty- two 40 tm transtainers and twenty shuttle carriers service this terminal.

HYDROCARBONS AND OTHER LIQUID BULKS

- **CESPA'S "GIBRALTAR-SAN ROQUE" REFINERY:**

The refinery's distillation capacity is 12 million tonnes of crude per year. At the port facility within the complex, there are seven loading and unloading berths for products (1.467 metres of pier), along with another terminal dedicated exclusively to barge activities. The latter facility has draughts of between 6m and 20 m depth, allowing ships of up to 175,000 tonnes deadweight to berth.

- **SINGLE-BUOY:**

Located in the Bay of Algeciras, at a depth of 60m, it allows oil tankers of up to 350.000 tonnes deadweight to be moored, with an unloading capacity of up to 12.000 m3/hour. It also has a bunkering facility.

- **COMPAÑÍA LOGÍSTICA DE HIDROCARBUROS (CLH):**

CLH has 203,144m3 of storage capacity distributed over 20 tanks in the Port of Algeciras. CHL uses the North Breakwater of the port for loading barges and its catchment basins have a pumping capacity of 500m3/hour.

- **VOPAK TERMINAL ALGECIRAS:**

The hydrocarbon and other liquid bulk storage terminal is located in Isla Verde Exterior and has a storage capacity of 400,00m3 distributed over 22 tanks. It also has a pier for vessels weighing up to 225,000 tonnes deadweight.

COAL

- **ENDESA GENERACIÓN:**

The Endesa terminal has more than 700 metres of quay line and excellent facilities for unloading and handling dry bulks. The 360- metre unloading quay has draughts of 23 metres and can accommodate ships of up to 270,000 tonnes deadweight; the loading quay allows for ships of up to 25,000 tonnes deadweight to berth. A third berth line can handle vessels of up to 60.000 tonnes deadweight.

STAINLESS STEEL

- **ACERINOX:**

The factory has its own port facilities for the importation of raw material and for the dispatch of finished products, with a production capacity of 1.1 million tonnes per year in steelworks, 900,000 tonnes of hot rolling and 670,000 tonnes of cold rolling. It occupies a total area of 125 hectares, and its terminal has 250 metres of quay with 9.5m of draught, as well as two gantry cranes.

WATER

- **THE ANDALUSIAN MEDITERRANEAN WATER AUTHORITY'S DOLPHINES ARE LOCATED IN PUENTE MAYORGA (SAN ROQUE):**

The berthing system for the loading of drinking water into tankers weighing up to 115.000 tonnes deadweight consists of dolphin facilities for berthing and mooring.

SAILING CLUBS

The Saladillo Marina in Algeciras offers more than 900 berths for recreational boats measuring up to 15m in length. It extends over 35 hectares, where the different yacht clubs of the city are located. The latter manage the berths under a concession system.

These facilities are complemented by those of Puerto Chico at La Línea de la Concepción, in the north-east bay area, where the yacht clubs manage 438 berths. The Alcaidesa Marina company has 624 berths for recreational and sports boats measuring up to 50 metres in length and provides docking, provisioning, and repair services.

Within the Port of Tarifa, the APBA also manages 118 berths for ships measuring between 5 and 11 metres in length.

FISHING

PORT OF ALGECIRAS

- **FISH MARKET AND PREMISES:**

With a total area of 9.635 m2 in the Fishing Quay, it is divided into auction and transit areas, exporters and shipowners premises and others.

PORT OF TARIFA

- **FISH MARKET AND PREMISES:**

It has a total area measuring 3.242 m2, arranged in the say way as in Algeciras.

6.2 BRIEF OVERVIEW OF SIGNIFICANT WORKS

During 2019, the following actions which were started in 2018 or before were completed:

- Core and implementation project to the urban and spatial planning of the pedestrian walkway between the access control unit and the new central access, parking facilities and the passenger terminal at the Port of Algeciras.
- Core and implementation project to the new OPE health and care area and external space planning in the Port of Algeciras.
- Integral remodelling and installation project of audio-visual equipment in the APBA conference room in the management building.
- Implementation project for the refurbishment and improvement of the changing rooms in building No 7 in the Port of Tarifa.
- Amended project to remodel the boarding tunnels in the Port of Algeciras.
- Project for the implementation of a 66 kv D/C high- voltage line; project for the improvement and extension of the underground power distribution pipelines in Los Barrios.
- Project for the connection at the “Cañuelo” substation (formerly “Guadacorte”) and the 220/66kv transformation.
- Project for the installation of perimeter enclosures and access control to the port area buildings and the Department of

Conservation at the Port of Algeciras.

Of the works started in 2019, the following were completed in the same year:

- Project for the underpinning of the existing bunkers in Puente Mayorga road and Refinery, San Roque.
- Project of complementary works to the rearrangement project of the southern access to the Port of Algeciras and the Saladillo Marina. Phase I.
- Construction project of facilities for the staff and machinery of the road cleaning services, waste collection and management of the Port of Algeciras.
- Restoration project in the south east corner of the Fishing Quay in the Port of Algeciras

WORKS STARTED IN 2019

- Adaptation project to the extension works in the North Quay in Campamento.
- Project for the rearrangement of the southern access to the Port of Algeciras and the Saladillo sports Marina. Phase I: filling and rearrangement of access.
- 2nd improvement to the draught at Juan Carlos I East Quay between bollards 33 and 53.

- Access road project to the exterior quay in the facilities in Campamento.
- Project for the rearrangement and reinforcement of the access roads to the container terminals in Juan Carlos I Quay and the Isla Verde Exterior East Quay in the Port of Algeciras.
- Core and implementation project of the Isla Verde Fort in the Port of Algeciras. Phase II.
- Implementation project of internal remodelling and updating of facilities in the administrative area of the APBA conservation building.
- Core and implementation project of a new lighthouse in Punta Paloma (Tarifa).
- Core and implementation project to refurbish the main toilets and their attached unites in the Tangier departure lounge for use as changing rooms for Tarifa maritime staff.
- Structural reinforcement project, adaptation of facilities in accordance with regulations and introduction of a forced air renewal system into the Port of Tarifa Fish Market building.
- Construction project of facilities for the staff and machinery of the road cleaning services, waste collection and management of the Port of Algeciras.
- Restoration project to the south east corner of the Port of Algeciras Fishing Quay.
- Medium-voltage underground network project, 400KVA transformation centre,

low-voltage underground network, 630KVA transformation centre (file At- 4130/97) and reconnection of the low- voltage circuits in the Juan Carlos I Quay in the Port of Algeciras.

- Reparation project of steel fenders in the dolphins No 1, 2, 3 and 4 in the Galera Quay in the Port of Algeciras.
- Interior refurbishment and renovation project of the administrative area facilities in the APBA conservation building.

During 2019, the Port of Algeciras Bay Authority continued to carry out work and studies for planned investments in infrastructures and installations, namely:

- Strategic environmental study and specific environmental studies defined in the scope document of strategic environmental assessment of the Infrastructure Master Plan of the Port of the Bay of Algeciras.
- Studies and reorganisation project of the southern access to the Port of Algeciras and the Saladillo Marina.
Phase II: new access controls and road surface refurbishment.
- Studies and project about the exterior slope on the lock breakwater in the Port of Tarifa.
- Studies and project to improve the draught at Bajo del Mar de Isidro.
- Studies and project to extend the south quay in the facilities in Campamento.

- Studies and project to extend the shipyard in the Saladillo Marina and reinforcing its esplanade.

- Studies and project to expand the Galera Quay and esplanade.

The following works have also been carried out:

- Project for the alignment of quay 1 in the Port of Tarifa.
- Project for the rearrangement of the RO- RO area and the Schengen zone at the Isla Verde Quay. Phase I
- Project for the adaptation of the esplanade attached to the Isla Verde roundabout, adjacent to the main road and the entrance to the TTP management area.
- Project for the extension of the shore ramp in the Saladillo Marina.
- Project of adequacy and reinforcement of the fixed sports pontoon superstructure in the Port of Tarifa.
- Project for the rearrangement of the Ro-Ro area at the Principe Felipe Quay and Pilot Training building.
- Landscaping project of the branch of Isla Verde on the main road of the Port of Algeciras.
- Amended project for an integral refurbishment and audio-visual conditioning of the APBA conference room in the Management building.

- Implementation project for the refurbishment and improvement of the changing rooms in building No 7 in the Port of Tarifa.
- Amended core and implementation project of the new OPE health and care area and external space in the Port of Algeciras.
- Remodelling project for the boarding tunnels in the Port of Algeciras Maritime Station. Phase II.
- Adaptation project of fire protection measures in the Port of Algeciras Maritime Station and boarding tunnels.
- Lighting automation project for the APBA main building.
- Project for the installation of a new air conditioning system on the ground floor, first floor, in the conference hall and conference room in the APBA main building.
- Adaptation project and renovation of the air conditioning system in the remodelled building in the Port of Algeciras Maritime Station.
- Project for the improvement of the underground medium-voltage 15KV lines between the Poseidon, North Quay I and North Quay II transformation centres within Isla Verde in the Port of Algeciras.
- Project for the installation of perimeter enclosures and access control to the port police and Department of Conservation buildings in the Port of Algeciras.

BRIEF DESCRIPTION OF THE MOST IMPORTANT WORKS:

PROJECT FOR THE REARRANGEMENT OF THE SOUTHERN ACCESS TO THE PORT OF ALGECIRAS AND THE SALADILLO MARINA PHASE I: FILLING AND REARRANGEMENT OF ACCESS.

This action is understood to be the first phase of rearrangement the southern access to the Port of Algeciras. During this phase, the esplanades necessary for defining the road that surrounds the Saladillo Marina sports facilities will be created, which will only be accessible from the current roundabout once it has been rearranged by the future road accesses. Therefore, this first phase refers to the needs of the southern access to the Port of Algeciras project from the CN-340 road which is being processed by the State Highway Administration.

Creating the esplanade requires the Saladillo Arroyo vaulting to be extended using the same double frame structure that this stream has upstream.

Other significant actions to be completed are the consolidation and improvement of the existing land, adaptations to the service networks and the creation of an interior roundabout on the road to the sports dock.

2ND PROJECT FOR THE IMPROVEMENT OF TO THE DRAUGHT IN THE JUAN CARLOS I EAST QUAY BETWEEN BOLLARDS 33 AND 53.

The Juan Carlos I Quay, formerly known as the Navy Quay, is the berthing facility of the container terminal of the same name. This quay was designed and built in the 20th century, between 1985 and 1998. The evolution of the vessels and container

handling cranes has made it necessary to adapt these berthing facilities for larger draughts and larger crane overloads. In the first two actions, this quay alignment was increased to the physical level -17.50. In order to take advantage of the full capacity of the Triple E-series container ships, it is necessary to increase the draught. This new draught improvement will take place in the north area of the quay and will measure about five hundred meters in length.

The work will consist of reinforcing the quay foundation using micro piles and repetitive injections and dredging for the draught increase in the approach area and in the area parallel to the ledge.

PROJECT FOR THE EXTENSION OF THE RO-RO BERTHING IN THE ISLA VERDE INTERIOR QUAY.

Where the Isla Verde Interior Quay and the Principe Felipe Quay meet, there is a RO-RO berth that is being used by freight vessels from the Strait.

Due to the increase of this type of traffic, the need to increase the width of the ramps as well as the distance between them is evident in order to ensure that two vessels can operate in the loading/unloading area at the same time. In order to do this, the existing RO-RO area shall be extended. This shall be done using piles, beams, and reinforced concrete, given the geotechnical conditions and the current structures that will be extended.

PROJECT FOR THE ACCESS TO THE OUTER QUAY IN CAMPAMENTO FACILITIES.

The esplanade at the Campamento Exterior Quay is not suitably paved for the loading and unloading of goods or for carrying out floating repairs. Given the occupation of the current interior dock, an appropriate

solution is to adapt the outer quay esplanade so that these activities can be carried out. Therefore, the following two actions are proposed:

- Prepare the esplanades that are attached to the outer quay using a rigid, fibre concrete pavement;
- Establish an access road from the Campamento access to the outer quay using an asphalt concrete pavement.

These actions will improve the quay's operating conditions.

PROJECT OF PORT SECURITY BUILDING AND PROCESS COORDINATION CENTRE FOR THE PORT OF ALGECIRAS BAY AUTHORITY

The objective is the integral refurbishment and extension of the current Security Park in the Port of Algeciras. The facilities were built in 2011, and they have remained unused since then. For this reason, and in view of the need to create facilities for the APBA Port Protection Department and the Port Process Coordination Centre, we have decided to refurbish and extend the building in order to house the new planned facilities there.

The part of the building to be used by the Port Security will be located in the original building of the Security Park, with the usual set up of administrative office buildings including offices, meeting rooms, leisure and training areas, warehouse, archives and changing rooms.

The Process Coordination Centre will be located mainly in the new part, although part of the programme will also be located on the second floor of the original building. It will also have the typical set up of an administrative building, including two

spaces that are unique to their size and use, one for CPD and an operators room where different port processes can be coordinated.

Beyond that, the building will house service premises for the proper development of the activities that are carried out in it, including toilets and maintenance facilities, etc.

In addition to this, the building will contain a series of free spaces, which include the previous access area, the most representative area of the building, and a large interior esplanade for the Port Security fleet.

CORE AND RESTORATION PROJECT OF THE ISLA VERDE FORT IN THE PORT OF ALGECIRAS. PHASE II.

This is the second phase of the restoration project which was carried out in 2006 when various constructions attached to the fort were eliminated and several sections of wall as well as the interior space next to the Algeciras Battery were recovered.

More than ten years after these initial interventions, APBA has decided to continue them once the expansion works of the port in the immediate surrounding area of the Fort have been completed. This second phase will complete the recovery of the fortification's entire walled enclosure, rebuilding lost sections and the old front gate.

The old Isla Verde Fort in Algeciras is considered a Cultural Interest Asset (Bien de Interés Cultural, BIC). Therefore, both the works project and the archaeological intervention project must have been submitted to the Territorial Delegation of The Ministry of Culture (now of Historical Heritage) in Cadiz, which

issued favourable reports on the 18th January 2019 and the 9th April 2019, in order for them to be carried out.

The works being carried out and defined in the project also receive funding from the 1,5% Cultural Programme, which was granted by the Secretary of State for Infrastructure, Transport and Housing in the Resolution of the 17th December 2018.

IMPLEMENTATION PROJECT FOR THE INTERNAL REFURBISHMENT AND RENOVATION OF FACILITIES IN THE ADMINISTRATION AREA OF THE APBA CONSERVATION BUILDING.

This project was drafted due to the increase in the different uses and the lack of space in the Conservation Building for being able to meet the technological and spatial requirements of the different departments and offices hosted there, in particular, the increase in the number of technical and administrative staff in the Department of Conservation in recent years.

This project involves a complete renovation and adaptation of the administration area in The Port Authority's Conservation Building. It will have a usable area of 950m². Its interior layout will be modified, and its facilities renovated.

PROJECT FOR THE REARRANGEMENT OF THE BOARDING TUNNELS AT THE PORT OF ALGECIRAS MARITIME STATION.

This project aims to rearrange the fixed gateways which connect the Algeciras Maritime Station with ferries, and vice versa.

This essentially entails:

- Installing new porcelain floors replacing the rubber buffer floors, which have been damaged significantly due to their intense use.
- Changing the sandwich panels on the roof, replacing the panels with a polyurethane interior for panels with a rock wool interior, which offers better thermal insulation and prevents water leaks.
- Installing stainless steel doors and glass with specific thermal properties, which allows boarding corridors to be closed and prevent rainwater from getting in.
- Improving and restoring lighting.
- Installing fans and industrial air blowers in order to improve climate control within these corridors.
- Painting all corridors, both metal structures and side panels, with white polyurethane, which will improve their brightness.

CONSTRUCTION PROJECT OF FACILITIES FOR THE STAFF AND MACHINERY OF THE ROAD CLEANING SERVICES, WASTE COLLECTION AND MANAGEMENT OF THE PORT OF ALGECIRAS.

This project aims to provide the Port of Algeciras' cleaning service with new facilities which provide them with enough space and the infrastructure necessary for them to carry out this service properly.

The new facilities shall have a 1,420m space, located next to the new Maritime Service of the Guardia Civil facilities on the Isla Verde Quay.

MEDIUM VOLTAGE UNDERGROUND NETWORK PROJECT, 400 KVA TRANSFORMATION CENTER, LOW VOLTAGE UNDERGROUND NETWORK, 630 KVA TRANSFORMATION CENTER (FILE AT-4130/97) AND RECONNECTION OF LOW VOLTAGE CIRCUITS AT THE JUAN CARLOS I QUAY OF THE PORT OF ALGECIRAS.

This project aims to move the subscriber transformation centre, with a 630 KVA transformer, to a new subscriber company distribution centre, with a new transformer for the company part of 400 KVA and the existing 630KVA subscriber transformer that will be moved. The subscriber company distribution centre will be the prefabricated type PF-205 from Ormazábal or similar.

The new distribution centre will be connected to the existing MV network owned by Endesa via two new underground MV circuits, that will be designed in such a way that the new planned TC will be connected between the existing distribution centres no. 105,783 ("CD PIF") and no. 79,053 ("CD Thomsen").

This project also includes the creation of a telecommunication channel consisting of 6 110m diameter tubes.

6.3 PROJECTS

The drafting of projects, works specifications, supplies, as well as the technical assistance studies carried out during the year are detailed in the following list, which only includes those exceeding 150,000 euros. In total, the following were drafted:

- Complementary works to the rearrangement of southern access to the Port of Algeciras and the Saladillo Marina. Phase I.
- Project for the extension of the shipyard Quay in the Saladillo Marina and its esplanade.
- Project for the adaptation of an esplanade for the management of heavy traffic in Isla Verde Exterior of the Port of Algeciras. Phase I: roads and area for inspection screening.
- Project of port security building and process coordination centre for the Bay of Algeciras Port Authority.
- Core and implementation project of new control facilities in the Campamento Quay, San Roque.
- Core and implementation project for environmental and landscape recovery of the public domain port between Puente Mayorga and the Guadarranque River.
- Project of medium voltage underground network, 400 kva transformation centre type cía., low voltage underground network, transfer of 630 kva transformation centre type subscriber (file at-4130/97) and reconnection of low voltage circuits in the Juan Carlos I quay in the Port of Algeciras.
- Project for the arrangement of the steel fenders,

located in the dolphins No 1, 2, 3 and 4 in the Galera Quay in the Port of Algeciras.

- Structural reinforcement project, adapting facilities in accordance with regulations and installation of a forced air renewal system in the Port of Tarifa Fish Market building.
- Project for the installation of a roof and for the arrangement of structural elements and the façade of the covered area of the Juan Carlos I Quay in the Port of Algeciras.
- Lot of projects for the adaptation of the fire protection measures in the Port of Algeciras.
- Thermal conditioning project for passenger boarding tunnels in the Port of Algeciras.
- Partial demolition project of the Algeciras Fish Market building.
- Technical specifications for the electrical maintenance service of the APBA's medium voltage, low voltage, outdoor lighting, and other electrical receivers.
- Technical specifications for the support and maintenance of the APBA mobile system for non-intrusive vehicle and container recognition.
- Technical specifications for the maintenance service of the APBA buildings' facades and roofs.
- Technical specifications for the disinfection of and insect and rat extermination within the APBA service area.
