

ANNUAL REPORT

ALGECIRAS BAY PORT AUTHORITY

2020

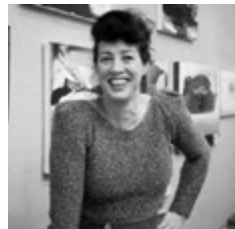

The Colours of ESPO Award 2020, Sasja Hagens.

ALGECIRAS PORT 2020 ESPO AWARD WINNER

XII EDITION OF ESPO'S SOCIAL INTEGRATION OF PORTS AWARDS, ON THE THEME OF "ENHANCING THE PORT-CITY RELATIONSHIP BY ENCOURAGING INNOVATORS AND LOCAL START-UPS TO BE PART OF THE PORT ECOSYSTEM"

SASJA HAGENS, PAINTER ESPO AWARDS TROPHY

The work shown on the cover is "Colours of ESPO" and deals with the subject of interaction between ports and cities. It is one of a series of eight paintings created by the Dutch artist, Sasja Hagens (Utrecht, 1973), exclusively for the ESPO Award Ceremony, the first one was presented during the VIII Edition in 2016.

PREVIOUS WINNERS

- 2019 – Port of Dover (United Kingdom): Transparen-SEA (Socially Engaged Accountability).
- 2018 – Port of Rotterdam Authority (The Netherlands): The Port of Rotterdam creates a good working environment for everyone.
- 2017 – Guadeloupe Port Caraïbes (France): Port'Art.
- 2016 – Bremenports (Germany): Luneplate: A unique natural paradise and valuable green port infrastructure.
- 2015 – Port of Dublin (Ireland): Port Communities Educational Support Programme.
- Special mention to:
- Guadeloupe Port Caraïbes (France): Discovering my port.
- 2014 – Port of Koper (Slovenia): No waste, just resources!.
- 2013 – Port of Antwerp (Belgium): Heritage, the breadcrumb trail between city and port.
- 2012 – Port of Genoa (Italy): Citizens of the Port – Knowing and Living the Port of Genoa.
- 2011 – Ports of Stockholm (Sweden): Hamnvision 2015 (Portvision 2015).
- 2010 – Port of Helsinki (Finland): Port as Part of the City.
- 2009 – Port of Gijón (Spain): Gijón Port & City Together.
- Special mentions to:
- Port of Genoa (Italy): Genoa Port Center – Breaking Down the "Social Distancing" of the Port.
- Port of Ghent (Belgium): Project Ghent Canal Zone – Working Together on the Sustainable Development of the Ghent-Terneuzen Canal Zone.

Gerardo Landaluce
Chairman APBA

The now historic date of the 14th March, 2020 changed the whole outlook of last year when the national State of Emergency - due to the Covid-19 outbreak and the following pandemic - took us into lock-down. This was a world-wide health emergency without precedent in living memory, where ideas such as prevention, precaution, anticipation and team-work were key factors that helped us come through an exceptional situation that all our Spanish ports have experienced; and here, specifically, at the Port of Algeciras Bay. The challenge - one of the greatest we have ever had to face - was, in fact, met head-on by our team of more than

5,000 men and women; a team categorised as “essential” port personnel who - together - were able to maintain our port’s normal 24/7 business hours, resulting in a public image of a solid port that guaranteed its services and was strategic to our customers and users despite the hardships. These were - and still are - times of change and adaptation for the maritime industry in general and for ports in particular, with consequences like blank sailings, transport price fluctuations and an extreme demand on equipment. Together with the social repercussions, such as restrictions on people’s movements and the risk of supply

2020 WAS A REAL CHALLENGE FOR OUR PORT

shortages, there has been a clear change in consumer trends, where the winners have been the exponential growth of e-commerce and increasing cargo flows out of China. As well as striving to keep everything at full flow - our port services, cargo throughput, operations on our terminals and constant communication with our Port Community - we have, at the same time, both been players in - and witnesses to - a tremendous digitalisation process. We have implemented new Human Resources models, with strategies such as teleworking; new methods of commercial manage-

We have been witnesses to great progress in digitalisation ment; and the adoption of emergency financial measures for all of our providers, licensees, customers and our Port Community. Although it is true that the disruption to passenger and vehicle traffic at our ferry ports in Algeciras and Tarifa, and the cancellation of Operation Cross-the-

OUR PRIORITY WAS GUARANTEEING THE SUPPLY CHAIN TO HOMESTEADS

Straits, did affect business, the strength of the Port of Algeciras Bay showed itself in the significant figures returned by total cargo and Ro-Ro throughput, among others. What was paramount to us was to guarantee the supply chain to homesteads everywhere by all means possible, something that was achieved thanks to our highly-efficient, committed Port Community. One example of that efficiency was witnessed in the port productivity rankings (published by the World Bank in collaboration with the internationally-renowned consultants, IHS Markit) under the 2020 Container Port Performance Index (CPPI): the Port of Algeciras Bay was ranked among the top ten most productive ports in the world.

Such acknowledgement by an external institution was then enhanced by the ESPO 2020 Prize that we won in recognition of the work in the field of innovation that our Port Authority is carrying out, to foster the integration of innovative, entrepreneurial businesses in the port sector within the framework of our Innovation Voyage Programme.

Above all, I would like to congratulate each and every one of my colleagues at APBA and our Port Community for their commitment and cooperation, and the spirit of responsibility that has reined throughout these most critical, difficult times we have all been through, both in 2020 and – still – in 2021. Likewise, I cannot forget our need to stimulate our economy’s recovery and create employment for our Region. These are two social priorities that our Port Authority is currently immersed in.

Finally, as 2020 finishes and we turn the page over to 2021, I am happy to see that we at the Port of Algeciras Bay have always been – and are still – able to face up to any obstacle placed in our path and sign them off as challenges that we have met face-to-face. Overcoming our problems together is the only way that we can go forward together.

2.5.2 SPECIAL LOADING AND UNLOADING FACILITIES

LOCATION	OWNER	YEAR BUILT	CHARACTERISTICS
"Gibraltar" Oil Refinery Pier	Cía. Española de Petroleos, SA (CEPSA)	1966	20 hydraulically-articulated loading/unloading arms with pipelines to storage tanks; 6 manually-articulated loading/unloading arms. Installation can be used for any Refinery product. facility capacity dependent on pumping capacity of tankerships. Maximum admitted pipe pressure: 150lb/inch.
Bay of Algeciras	Cía. Española de Petróleos, SA (CEPSA)	1976	Sea island to unload crude from VLCCs, etc.
Acerinox Facilities	Acerinox	1970	250-linear-metre quay with two gantry cranes for unloading raw materials (scrap) and loading manufactured goods
Puente Mayorga dolphins	Dirección General de la Cuenca Mediterránea Andaluza	1981	2 x 12-inch water-loading points. Flow: 5760 Tm/h.
Endesa-Puertos facility	Endesa Generación, SL	1984	1 x 1,500 Tm/h (max) continuous loading gantry crane. 1 line of 4,500 Tm/h (max) conveyor belts for unloading. 1line of 1,500 Tm/h (max) conveyor belts for loading.
Ingeniero Castor R. del Valle breakwater	Compañía Logística de Hidro-carbuos CLH, SA	2012	3 refuelling/defuelling pipes, each with a 750 MT/h capacity.
Ingeniero Castor R. del Valle breakwater	Compañía Logística de Hidro-carbuos CLH, SA	2012	3 10-inch refuelling/defuelling folding arms connecting with 4 pipes for IFO and Gasoil. 8Kg/csqm maximum working pressure and a 3,000 MT/h flow.
Explanada Isla Verde Exterior	EVOS ALGECIRAS	2013	Hub Distribution. Petrol product storing facilities: 22 tanks ranging from 2,000 to 40,000 cubic metres. Dock (25 metres in draught) providing access to vessels and barges.

2.8 BRIEF OVERVIEW OF SPECIFIC TRAFFIC FACILITIES

Passengers

PORT OF ALGECIRAS

Ferry Berth

There are eight ferry berths that serve the lines covering the Strait. Passenger transfer is by elevated platforms and walkways that connect the berths with the Passenger Terminal. For passengers who board with their vehicles, there are also spaces and specific areas equipped with the required services.

Passenger Terminal

The main passenger terminal building occupies a 12,000 sqm surface area. The ground floor is for ticket offices, shipping-line offices, shops and institutional offices, together with disembarkment halls. The top floor has embarkment and disembarkment areas and a cafeteria, as well as luggage, passport and ticket control points.

The main shopping area is in the annexe building, which occupies a 7,900 sqm surface area over two storeys. The ground floor is used by travel and forwarding agents and the top floor is used by various forwarders and shipping companies. On the west wing of the building is where we have located our Heliport terminal.

Multi-Storey Car-Park Building

This facility is mainly used by passengers travelling to Ceuta or Tangiers and who prefer to leave their cars in Algeciras. The car-park has 810 spaces over 3 floors (180m x 38m). The ground floor is open-plan and is used for arranging embarkment of vehicles onto ferries. The fourth floor is our helipad.

Express parking is located in front of the passenger terminal.

PORT OF TARIFA

Ferry Berth

There are two berths currently used by high-speed vessels that cover the Tarifa-Tangier City-Tarifa line.

Passenger Terminal

The Passenger Terminal, occupies a 2,116 sqm surface area divided into two storeys. The ground floor is where the ticket-sales premises and shipping-line check-in offices, cafes and official institutions are to be found. Official institutions are also located on the top floor.

Multi-Storey Car-Park Building

The Port of Tarifa has a the car-park with direct access to Tarifa's Passenger Terminal.

Ro-Ro Traffic

There are 7 other Ro-Ro ramps (apart from the ones mentioned under the passenger section) with 10.5m draughts located on the following quays: one on Isla Verde with draughts of 10m; one on the Ingeniero Castor R. del Valle Breakwater with draughts of 14.5m; another on Principe Felipe Quay with draughts of 14.5m; and two on Juan

Carlos I Quay (one on the North side and one on the South side, with draughts of 9m and 10.5m, respectively). And another two ro-ro berths on Isla Verde Exterior Quay (one with 17.50m draughts on North Quay and another with 18.50m draughts on the Quay adjacent the breakwater). These berths serve Ro-Ro ships that cover the Algeciras-Ceuta and Algeciras-Tanger Med lines; and sometimes cover sporadic lines, such as the one set up to Mauritanian ports.

Our TTP (Heavy Goods-Traffic Terminal), located on Isla Verde Exterior makes up an enclosed, well-controlled area where heavy goods traffic (semi-trailers and complete cargo loads) operating within Port of

Algeciras premises can be gathered. This encourages the optimisation of the import-export logistics chain and offers an added value component, both to operators and hauliers.

Containers

APM Terminals Algeciras

This terminal, located on Juan Carlos I Quay and occupies a 67,1 Ha surface area. It has a 1,941m berthline offering draughts of between 14 and 16m. There are 19 Portainer cranes (8 x 74 tm, 8 x 70 tm, 3 x 65 tm) and 65 transtainers and 102 tractor heads.

3

4a

4b

5

6

7

Total Terminal International Algeciras (TTI-A)

This terminal, located on Isla Verde Exterior Quay, occupies a 35.76 Ha surface area. It has a 650m berthline with 18.5m draughts, 8 Portainer cranes and 32 transtainers (40tm) and 20 shuttle carriers.

Hydrocarbons and Other Liquid Bulks

CEPSA’s “Gibraltar” Oil Refinery

The refinery’s distilling capacity is 12-million tonnes of crude per year. At the port facility within the complex, there are seven loading and unloading berths for products (1,467 metres of pier), along with another terminal dedicated exclusively for barge activities. The latter facility has draughts of between 6m and 20m depth, allowing ships of up to 175,000 tonnes deadweight to berth.

Sea Island

Located in the Bay of Algeciras, at a depth of 60m, allows oil tankers of up to 35,000-tonne (DW) to be moored, with an unloading capacity of up to 12,000m3/hour. It also has a bunkering facility.

CLH (Compañía Logística de Hidrocarburos)

CLH has a storage capacity of 203,144 m3 at the Port of Algeciras, divided up into 20 tanks. The company also employs our port’s North Dock to load up fuel barges; its flow collection boxes have a 500 m3/hour pumping capacity.

Evos Algeciras

Located on Isla Verde Exterior, the hydrocarbon and liquid bulk terminal has a storage capacity of 203,144m2, divided up into 22 tanks. It also has a pier for ships of up to 225,000 tonnes DW.

Coal

Endesa Generación

The terminal has more than 700 metres of quayline and excellent facilities for unloading and handling dry bulks.

The 360-metre unloading quay has draughts of 23 metres and can accommodate ships of up to 270,000 tonnes DW; the loading quay allows for ships of up to 25,000 tonnes DW to berth. A third berth line can handle ships of up to 60,000 tonnes DW.

Stainless Steel

Acerinox

The factory, with its own port facilities to import raw materials and dispatch finished products, has a steel plant production capacity of 1,100,000 tonnes, a hot-rolling capacity of 900,000 tonnes and a cold-rolling capacity of 670,000 tonnes per year.

The plant occupies a 125-hectare surface area and its port terminal has a 250-metre quayline with 9.5-metre draughts and two gantry cranes.

Water

The Andalusian Mediterranean Water Authority’s dolphins are located in Puente Mayorga, near San Roque

Berthing system for the loading of water in tankers up to 115,000 TPM, made by berthing and mooring breakwaters.

Sports & Leisure

The El Saladillo Marina in Algeciras offers 900 berths for leisure craft of up to 15 metres length. It occupies 35 hectares that is

home to several locally-based sailing clubs that manage the berths under license.

The facility is complemented by Puerto Chico in La Linea de la Concepcion to the North west of the Bay, where other sailing clubs manage 438 berths, and where the Alcaidesa Marina company has more than 600 more berths on offer for leisure and sports craft of up to 50 metres length with a complete range of landfall, supply and repair services. At the same time, APBA also manages the Port of Tarifa’s 118 berths for boats of between 5 and 11 metres length.

Fresh Fish

PORT OF ALGECIRAS

Fish Market

The total surface of 7,910 sqm is divided up into an auction hall, exporters’ and ship-owners’ premises, and traffic circulation and other sundry areas on the Fishing Dock.

PORT OF TARIFA

Fish Market

It has a total area measuring 3.242 sqm, arranged in the same way as the Algeciras market.

6.2 BRIEF OVERVIEW OF SIGNIFICANT WORKS

The following works that had commenced in 2019 (or pre-2019) were completed in 2020

Project to adapt North Quay extension works at Campamento.

Project to re-align and reinforce the road surface on access arteries to the Juan Carlos I Quay container terminal and Isla Verde Exterior East Quay at the Port of Algeciras.

Second Project to improve draughts on Juan Carlos I Quay from bollard 33 to 53.

Reorganisation of the Southern Gate and El Saladillo Marina at the Port of Algeciras.

Phase One: land-fill and road re-alignment.

Basic Execution Project for a new lighthouse in Punta Paloma, Tarifa (Cadiz).

Execution Project to alter and refurbish the interiors of facilities in APBA's Conservation Building administrative area.

Execution Project to structurally reinforce, adapt facilities to current regulations and incorporate a forced ventilation system in

the fish market building at the Port of Tarifa.

Project to repair the shield-type fenders located on dolphin facility berth numbers 1, 2, 3 and 4 on La Galera Quay at the Port of Algeciras.

The following works that had commenced in 2020 were completed in the same year:

Project to expand Isla Verde Interior Ro-Ro-Berth.

Project to reorganise the esplanade adjacent the accesses to the BIP, Fishing Dock and Fish Market buildings at the Port of Algeciras.

Project for a track and fixing system between bollards 26 and 30 on Isla Verde Exterior East Quay.

Project to completely alter N°1 & N°2 toilet facility nuclei on the ground floor east co-

ridor of the Passenger Terminal at the Port of Algeciras.

Supply and installation of bus shelters to the bus-stops in the Passenger Terminal at the Port of Algeciras.

Project to repair pier N° 5, located on the northern bank of El Saladillo Marina.

Project to partially demolish the Fish Market building at the Port of Algeciras.

STARTED WITHIN 2020:

Project to refit an esplanade on Isla Verde Exterior Quay to handle heavy goods traffic at the Port of Algeciras. Phase One: Roads and Scanner Area.

Basic Execution Project to alter the toilet facility nucleus and offices adjacent the Tangiers embarkment hall, to provide changing-rooms for the Tarifa Passenger Terminal cleaning service.

Basic Execution Project to refit and refurbish the old lighthouse-keepers’ houses adjacent Tarifa Lighthouse.

Basic Execution Project to provide new checkpoint facilities on Campamento Quay (San Roque).

Project to install a roof, to and repair structural elements and the façade of the Juan Carlos I Quay warehouse at the Port of Algeciras.

Project to upgrade the fire-fighting installations at the Juan Carlos I Quay warehouse in Algeciras.

Project to upgrade the fire-fighting installations at the Millan Picazo Auditorium in Algeciras.

Landscaping Project to create a Green Belt around the Southern Gate at the Port of Algeciras.

Project to upgrade the fire-fighting installations at the Port Police Headquarters Building.

Project to upgrade the fire-fighting installations at the new APBA Headquarters in Algeciras.

Project to upgrade the fire-fighting installations at the industrial warehouses in APBA’s Conservation Building in Algeciras.

Project to install a PCI pump-house on Isla Verde’s Detached Breakwater.

APBA CONTINUED TO UNDERTAKE THE FOLLOWING KEY WORKS AND STUDIES TO SCHEDULE INVESTMENT IN INFRASTRUCTURE AND FACILITIES DURING 2020

Studies to monitor the coast-line on the Bay of Algeciras.

Studies and Project to complete the North Quay at Campamento.

Studies and Project for tracks and fixing system between bollards 26 and 30 on Isla Verde Exterior East Quay.

Studies and Project to construct a modular office and service building to house the future Isla Verde Exterior esplanade scanner unit.

Studies and Project for a main artery road on the esplanades at our Campamento port facility. San Roque.

Studies and Project to demolish the under-sea gallery on the Interior Dock at Campamento.

Studies and Project to replace and improve berth and fender components on Juan Carlos I Quay alignment.

Studies and Project to execute an outer guide wall on the Dry Dock lock housing at Campamento.

Studies and Project to refurbish the levelled area freed up by the partial demolishing of the Fish Market building at the Port of Algeciras.

Studies and Project to re-load sand on to El Rinconcillo Beach.

THE FOLLOWING WORKS SETTLEMENTS HAVE ALSO BEEN MADE

Project to underpin existing WWII bunkers on the Puente Mayorga to Campamento Trail in San Roque.

Project for an access road on the Exterior Quay at the Campamento facility.

Reorganisation of the Southern Gate and El Saladillo Marina at the Port of Algeciras. Phase One: land-fill and road re-alignment.

Supplementary works to the Project to reorganise the Southern Gate and El Saladillo Marina. Phase One.

Project to reorganise the esplanade adjacent the accesses to the BIP, Fishing Dock and Fish Market buildings at the Port of Algeciras.

Project for a pilot beam, and to refurbish the esplanade on Isla Verde Exterior Phase B East Quay.

Basic Execution Project to alter the toilet facility nucleus and offices adjacent the Tangiers embarkment hall, to provide changing-rooms for the Tarifa Passenger Terminal cleaning service.

Execution Project to structurally reinforce, adapt facilities to current regulations and incorporate a forced ventilation system in the fish market building at the Port of Tarifa.

Modified Basic Execution Project to develop and landscape the pedestrian access between the Central Gate checkpoint, the Uncovered Car-Park and the Passenger Terminal at the Port of Algeciras.

Execution Project to alter and refurbish the interiors of facilities in APBA’s Conservation Building administrative area.

Project to organise the Port of Algeciras Central Gate: Phase Two - Nº1 Modified Project to organise the Port of Algeciras Central Gate: Project to develop the area between the Central Gate, Plaza San Hiscio and Paseo de la Conferencia.

Modified project to alter the embarkment tunnels at the Port of Algeciras Passenger Terminal (Phase Two).

Project to refurbish the south-east corner of the Fishing Dock at the Port of Algeciras

BRIEF OVERVIEW OF SIGNIFICANT WORKS:

REORGANISATION OF THE SOUTHERN GATE AND EL SALADILLO MARINA AT THE PORT OF ALGECIRAS. PHASE ONE: LAND-FILL AND ROAD RE-ALIGNMENT.

This project is to be understood as Phase One of the Port of Algeciras’s South Gate reorganisation. During Phase One, we will create the levelled areas required to define the ring road around the leisure facilities at El Saladillo Marina, which will then only be accessible from the existing roundabout,

once finally re-aligned to the forthcoming access roads. This is how Phase One meets the needs of the Port of Algeciras CN-340 South Gate Project, and is currently being processed by the Spanish Highway Department.

The creation of the esplanade needs the Saladillo River’s vaulting to be extended with the same, double-framed structure it currently has upstream.

Other significant works include the reinforcement and improvements to current land, refurbishment of the service networks and building an internal roundabout for the marina’s road system.

PROJECT TO EXPAND THE RO-RO BERTH ON ISLA VERDE INTERIOR.

The Port of Algeciras Passenger Terminal is where the regular RO-PAX lines serving Ceuta and Tanger-Med operate, along with pure Ro-Ro traffic lines. We have had operational issues due to the very high volume of traffic and the limited surface area available where we can organise embarkment and disembarkment.

The forecast growth in cargo throughput to the Port of Tangiers will need new infrastructure and/or a complete refurbishment of the existing one, if we are to meet demands. Our TTP (Heavy Goods Traffic

0

1

2

3

4b

5

6

7

Terminal) and the refurbishment of esplanades adjacent the Isla Verde Exterior Ro-Ro berth have now been completed, so - if two ships need to operate at the same time - expanding the Ro-Ro berth itself seems to be an obvious solution.

Work consists basically of broadening the ramps and manoeuvring surface of the existing Ro-Ro berth, between the Isla Verde Interior Quay and Principe Felipe Quay alignments by means of a pile structure that would support a pre-fabricated beam decking; we would then execute a reinforced concrete slab on top of it. The berth would then be provided with fenders and mooring equipment.

PROJECT TO REORGANISE THE ESPLANADE ADJACENT THE ACCESSES TO THE BIP, FISHING DOCK AND FISH MARKET BUILDINGS AT THE PORT OF ALGECIRAS.

The surfacing of esplanades located between the main road and the Fishing Dock are seriously deficient for the following reasons:

- The plots belonging to the old buildings and warehouses that have been demolished were never paved on completion of their removal and thus have no surface;

- The surfacing is deteriorated in certain areas and should be underpinned;
- The majority of the surfacing - except the stretch that was replaced on executing the new service trench - is more than thirty years old. Although it has been strengthened with a top asphalt agglomerate, it should be reinforced again.
- Readjusting the gradient to improve the run-off towards drains - or towards the Fishing Dock's quay edge - would be another improvement.

The above interventions are necessary and are justified if we are to employ the esplanades to process HGVs - or any other vehicles - in crossing the Strait.

All the above should also be taken into account regards the esplanade located in the area between the main road, the BIP service road and the Warehouse.

Once upon a time, there was a petrol-cum-service station there that has since been dismantled, but the surfacing was never replaced. It therefore requires a similar surfacing package as the one done on the BIP car-park to be executed.

In the same way, all the new roads will be given new service channels and a new rain-water drainage network.

PROJECT FOR TRACKS AND FIXING SYSTEM BETWEEN BOLLARDS 26 AND 30 ON ISLA VERDE EXTERIOR EAST QUAY.

TTI-A's container terminal superstructure, fitting-out and systems are currently in service, the terminal having begun operations on 5th May, 2011. Up to now, TTI-A has returned figures of 1.5-million TEUs every year. We expect that business - in terms of the terminal's forecast volume per customer potential - will only keep growing.

The main aim of the project is to extend the quayside crane track and support rails on Isla Verde Exterior by approximately one-hundred-and-fifty metres. This will provide the terminal with a longer, more useful operational quayline.

SECOND PROJECT TO IMPROVE DRAUGHTS ON EAST JUAN CARLOS I QUAY FROM BOLLARD 33 TO 53.

Juan Carlos I Quay was originally called El Navio Quay and currently lends its berthing infrastructure to a container terminal of the same name. The quay project was drafted and built between 1985 and 1988. The evolution of container ships and cranes has forced us to adapt its infrastructure to deeper quay draughts and higher capacity STS cranes. Two previous projects have seen

the draughts deepen to a depth of -17.50m. However, Triple-E Class containerships need even deeper quaysides to be able to exploit their load capacity to the utmost. This has obliged us to deepen draughts once more. The new draught improvement will be carried out along an approximately 500-metre stretch of the quay's northern edge.

The works consist of basic reinforcement of the quay foundation by means of micro piles and repeated injections, and by dredging to increase draughts around the approach and quay edge areas.

PROJECT TO RE-ALIGN AND REINFORCE THE ROAD SURFACE OF ACCESS ROADS TO THE JUAN CARLOS I QUAY CONTAINER TERMINAL AND ISLA VERDE EXTERIOR EAST QUAY AT THE PORT OF ALGECIRAS.

Our container terminal service roads - both to Juan Carlos I Quay and Isla Verde Exterior - are showing similar surfacing disorders, both of them being in a bad state.

We have detected a wide range of shortcomings that have affected their good working order, as well as their service life, due in part to the time gone by and also to the intense HGV traffic that these road surfaces have withstood. Although the main cause of their deterioration has been due to intense

0

1

2

3

4a

4b

5

6

7

HGV traffic and heavy loads, we have also appreciated factors such as oil spillage, and fuel and coolant leaks from the vehicles themselves. The intensity of the spills increases in stoppage areas, such as at entry pre-gates.

Finally, given the intense flow of HGVs that enter and leave our terminals, it is only right that we should refurbish the foundations of these roads to restore them to their maximum capacity, and also pursue a separation of interior and exterior traffic

between terminals. The state of deterioration of the roads is such that we will have to repair and reinforce the surfacing to enable their return to suitable operational status.

The main aim of these works is to re-align Juan Carlos I Quay and Isla Verde Exterior East Quay container terminal service roads, and reinforce and improve the existing road-surface. In some particular areas, this implies the complete replacement of the surface, due to the tremendous damage it has suffered.

In the more damaged areas - and where the prevalence of solvent-type spills and leaks are more probable - the existing road will be completely replaced with steel-fibre, reinforced-concrete surface. prevé mayor posibilidad de vertidos o derrames de sustancias disolventes, se sustituirá el firme existente por una de hormigón con fibras.

PROJECT TO ADAPT NORTH QUAY EXTENSION WORKS AT CAMPAMENTO.

Whilst the extension works to Campamento North Quay were ongoing, a series of incidents occurred that resulted in the contract being terminated, leaving the project unfinished, and with several execution flaws that affected port business.

This project has addressed these matters, and has brought about the pending dredging and demolition works to a close; caissons - that had been pre-anchored -

secured in their intended position; the enclosure and securing of its esplanade; and the restoration of Cernaual's lock opening and closing mechanism.

The main works items that have been executed are:

Excavation and dredging; demolition of the buried gallery; foundation bedding; transfer, anchoring and fill of caissons; submerged concreting to complete the quay alignment; caisson repairs; demolition and repositioning of the lock housing, and a structure to enclose and fill the esplanade.

BASIC EXECUTION PROJECT TO REFIT AND REFURBISH THE OLD LIGHTHOUSE-KEEPERS' HOUSES AD- JACENT TARIFA LIGHTHOUSE.

The works intended in this execution project was carried out on the building next to Tarifa Lighthouse. The lighthouse is classified as a Listed Property of Cultural Interest, pursuant to the National Historical Heritage Act 16/1985 (25th June, 1985).

The Andalusian Historical Heritage Act 14/2007 (26th November, 2007) sets down under Article 28 - "Issue of Listed Properties of Cultural Interest" - that:

1. The context of a listed property of Cultural Interest shall be made up of the comple-

te setting of the buildings and spaces whose alteration may affect the intrinsic values of the property at hand - contemplation, appreciation or study of the same - be they composed both of immediately adjacent or by non-adjacent, or detached, buildings.

2. Any intervention undertaken on the setting shall be subject to prior authorisation as provided under Law, in order to halt any such alteration as referred to above.

The works scheduled for the property intend to reinforce the construction - which is almost derelict - and restore it as an area to support the workings of the lighthouse for APBA use, by restoring all the characteristic features that have been lost due to numerous interventions that it has suffered over the years.

BASIC EXECUTION PROJECT TO PRO- VIDE NEW CHECKPOINT FACILITIES ON CAMPAMENTO QUAYS (SAN ROQUE).

This project deals with two unused buildings that are joined by an overhead canopy and face several roads. The main building only has a ground floor that is 30cm above the exterior road level, with an easy access that has been adapted with a ramp. The building is laid out on one floor to house all the different working areas at the same built-up height.

The other building – a checkpoint cabin – is much smaller, and also has one ground floor that is 15cm above the exterior road level. The building is laid out on one floor that houses the different working areas at the same built-up height.

The schedule of requirements we need to meet is the same one that has been set down by the proprietor (APBA) and involves the following:

- **Main Building:** Administrative offices, meeting-room, office, store, DPC room, hall, changing-room foyer, male changing-room, female changing-room, and customised mixed changing-room.

- **Checkpoint Building:** Port Police checkpoint, Civil Guard checkpoint, hall, male toilets (shared), and female toilets (shared).

Outside the buildings, there is an area currently usable as a car-park with four spaces; this area will all be restructured, and one of the car-parking spaces will be adapted close to the pavement. There will also be a new, sign-posted car-park that will have four covered spaces with a metallic structure that will hold up a corrugated-sheet roofing. Access to the area will be through bi-articulated, swinging gates.

PROJECT TO INSTALL A ROOF AND REPAIR STRUCTURAL ELEMENTS TO THE FRONT OF THE JUAN CARLOS I QUAY WAREHOUSE AT THE PORT OF ALGECIRAS.

The project defines the works required to replace Juan Carlos I Quay’s warehouse roof, and the repair of the building’s structure and façade, where the state of corrosion has become evident. It is thus necessary to repair the building’s lost mass, as well as refitting its interior lighting system to achieve a 300-lux mean horizontal luminance throughout the warehouse. Thus, we are going to take advantage of the natural light available and gain a better per-

formance of artificial lighting to reduce the consumption of electricity in the most efficient way possible.

We are also going to install an anti-bird mesh inside the non-intrusive inspection and in the secondary inspection buildings.

LANDSCAPING PROJECT TO CREATE A GREEN CORRIDOR AROUND THE SOUTHERN GATE AT THE PORT OF ALGECIRAS.

This project includes the landscaping of certain identified areas, i.e., our Southern Gate area, and El Saladillo Marina’s façade with its the embankment towards the city.

These two areas are both located in the El Saladillo area that currently makes up a port basin of the same name. The main aim of the project is to provide a renewed, attractive feature for the whole Southern Gate area, El Saladillo Marina’s quaylines, and their surroundings. The addition of these new landscaped areas will give off a coherent public image of our port by making the green belt a focal point that connects our port premises with its environment.

Following the trend of recent interventions, plant material is construed as “green infrastructure” – another layer that is subordinate to a port’s “grey infrastructure” – but which helps the latter’s integration

into the urban realm by incorporating ecological factors such as biodiversity, carbon sequestering and sustainable drainage.

The project had been initially conceived as a simple gardening project, but has since become one to create a green belt around the areas comprising our Southern Gate and El Saladillo, bringing together everything that one would associate with a primary Urban Green Infrastructure Project.

6.3 PROJECTS

PROJECT DRAFTS, WORKS TENDERS, SUPPLIES, AND TECHNICAL SUPPORT STUDIES (OVER €150,000.00) UNDERTAKEN DURING THE YEAR ARE ALL DETAILED IN THE FOLLOWING BREAKDOWN

- Project to complete the North Quay at Campamento.
- Project for a track and fixing system between bollards 26 and 30 on Isla Verde Exterior East Quay.
- Project to construct a modular office and service building to house the future Isla Verde Exterior esplanade scanner unit
- Project to build a main artery road on Campamento port facility esplanades (San Roque).

- Project to demolish the undersea gallery on the Interior Dock at Campamento.
- Project to replace and improve berth and fender components on Juan Carlos I Quay alignment.
- Execution Project to build an outer guide wall for Campamento Dry Dock sluice gate.
- Project to refurbish the levelled area freed up by the partial demolishing of the Fish Market building at the Port of Algeciras.
- Project to re-load sand onto El Rinconcillo Beach.
- Execution Project to provide a balustrade along the promenade at Puente Mayorga. Phase One: from Arroyo de los Gallegos (River Cachon) to Pepe Cordoba Square.
- Execution Project to provide a balustrade along the promenade at Puente Mayorga. Phase Two: from the Callejon del Moro area to Campamento
- Modified Basic Execution Project to restore Isla Verde Fort – Phase Two, at the Port of Algeciras.

- Basic Works Execution project to refurbish the surroundings of APBA’s Administration Building.
- Project to provide new street-lighting on Port of Tarifa’s commercial quay.
- Landscaping Project to create a Green Belt around the Southern Gate at the Port of Algeciras.
- Project to install recharging stations for electrical vehicles on the Port of Algeciras Bay Authority port premises.
- Project to affix new FRP trellises onto the new enclosure fences at the Port of Tarifa – Phase One.
- Project to install drop ceilings and new lighting in the refurbished area of Algeciras Passenger Terminal.
- Project to provide a temporary waste storage point at the Port of Algeciras Bay.
- Tender to supply and install two mobile walkways in the lateral embarkment tunnels at the Port of Algeciras ferry terminal.
- Tender for technical specifications required to hire high- and low-voltage electrical power supplies at APBA.

- Tender to provide a disinfection service for outside areas of the facilities managed by the Port of Algeciras Bay Authority, due to the Covid-19 health crisis (and pursuant to Royal Decree 463/2020).
- Supply and installation of signage and staff safety measures at APBA’s administration building, due to the Covid-19 health crisis (and pursuant to Royal Decree 463/2020).
- Tender to supply and install rented marquees to organise passenger embarkment in outside locations at the Passenger Terminals in Algeciras and Tarifa, due to the Covid-19 health crisis (and pursuant to Royal Decree 463/2020).
- Tender for technical specifications required to provide a maintenance service for wooden piers and structures at port

- facilities directly managed by APBA in Algeciras, Tarifa and La Linea.
- Tender for technical specifications required to provide a maintenance and weeding service for several areas at port facilities managed by the Port of Algeciras Bay Authority.
